佛山中隆铝业有限公司

Foshan Zhonglong Aluminum Industry Co., Ltd.,

每一块产品，都倾注了生产者的汗水
Every product is poured with the sweat of the producer

细微，见于职业操守。
Our professional ethics are shown in every detail

每一座建筑，都凝结了设计师的智慧
Every building condenses the wisdom of the designer

雄伟，印证神工匠心。
Majestic, proving the craftsmanship.

我们用——汗水和智慧演绎着城市建筑的精彩！
We use sweat and wisdom to deduce the brilliance of urban architecture!

中隆铭铝 ZOLON

立足品质
我们认为
品质是一种责任。
与其说市场在不断检验商人的盈利能力，
不如说在检验其商德，
我们相信，
未来商业博弈的天平，
总会朝意承担责任的一方倾斜。
品质也是一种智慧，
我们认为，罔顾消费者利益获取的终只是蝇头小利。
固本培源，
大舍才会有大得。
品质更是一种境界。
当核心竞争力有机地融入产品战略体系时，
企业构建的将是一副和谐的投资回报蓝图

以人为本 / 以诚待人 / 追求卓越

People oriented / treat people with sincerity / pursue excellence

我们的理念

脚踏实地、诚信经营
开拓进取、技术革新

我们的战略

立足当下、放眼未来
创造价值、构建共赢

我们的目标

创百年品牌，做一流企业，
打造中国金属铝幕墙优秀品牌

中隆铭铝

ZHONGLONGMINGLV

用心服务，紧跟时代潮流，满足客户的不同需求。

SERVE ATTENTIVELY, KEEP UP WITH THE TREND OF THE TIMES AND MEET THE DIFFERENT NEEDS OF CUSTOMERS.

公司介绍 COMPANY PROFILE

佛山中隆铝业有限公司是一家集研发、设计、制造、市场营销于一体的生产制造型企业。主要致力于设计与生产高档建筑室内外装饰用铝单板、金属天花、包柱及各种装饰铝板等产品，并提供优良的服务及相关解决方案，为客户创造高品位的艺术空间环境是公司执着的追求。

佛山中隆铝业有限公司引进国内外先进的金属幕墙加工机械设备和金属天花生产线，在管理上导入国际上先进的生产技术、质量控制和管理技术，拥有丰富经验的产品开发及设计团队，专门配合建筑进行各种天花吊顶系列造型以及工艺构造的深化设计，使得建筑思想中各种方案的天花吊顶、幕墙结构能突破材料和工艺的限制成为现实。

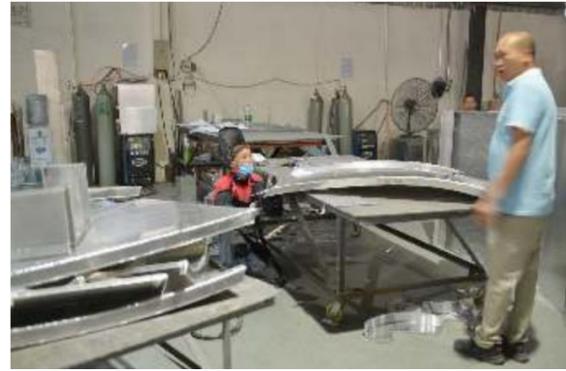

公司严格按照ISO9001:2000 质量保证体系各要素中的标准和要求运作，在产品的生产控制过程中对于产品的质量检测和把关。企业长期坚持“质量为先、诚信至上、服务一流”的经营理念，竭诚打造优质品牌。公司拥有先进的全自动喷涂设备和最先进的控温炉、液化气燃烧系统及德国的前处理工艺技术数控激光剪板机、数控折弯机、数控开料机、塔式数控冲床，具备了年生产氟碳喷涂铝幕墙50多万平方米和铝天花板100万平方米的生产加工能力，在国内同行中堪称规模较大，设备先进，服务到位的企业。

“中隆铭铝”“ZOLON”品牌从推广以来，以其卓越的品质与其优质的服务，赢得了市场高度的信任和认可，并深受广大客户的欢迎和喜爱。我们将继续以严格的管理和不断的进取发展自己，依靠雄厚的技术力量、现代化的精良设备、高效的管理方式、严密的质量监控手段、完善的质量保证体系、优秀的系列产品、优质的售后服务，竭诚为社会各界服务，共创更加美好的明天！

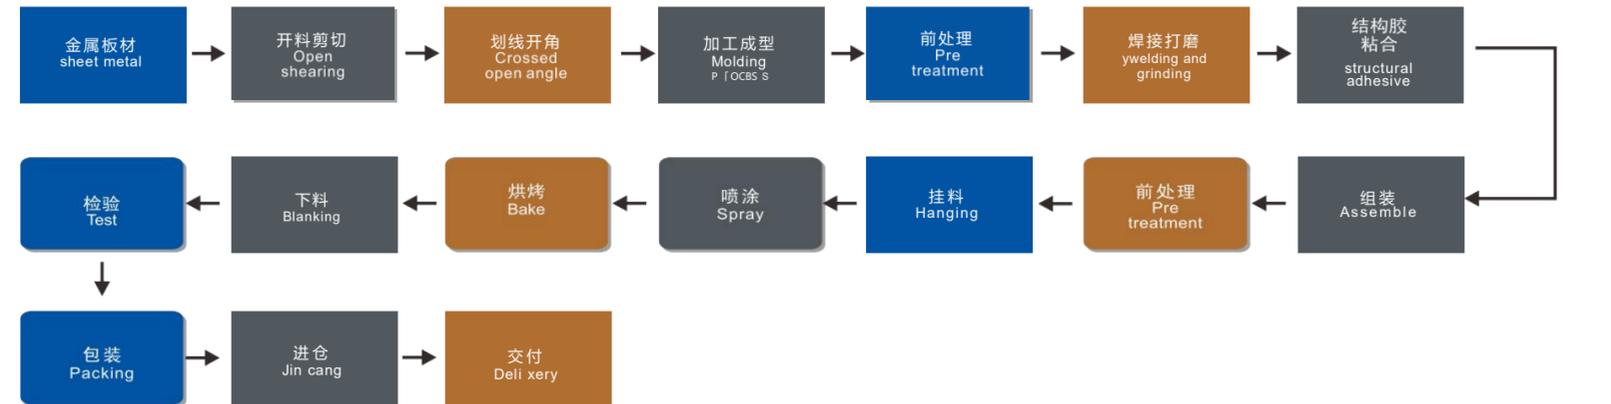

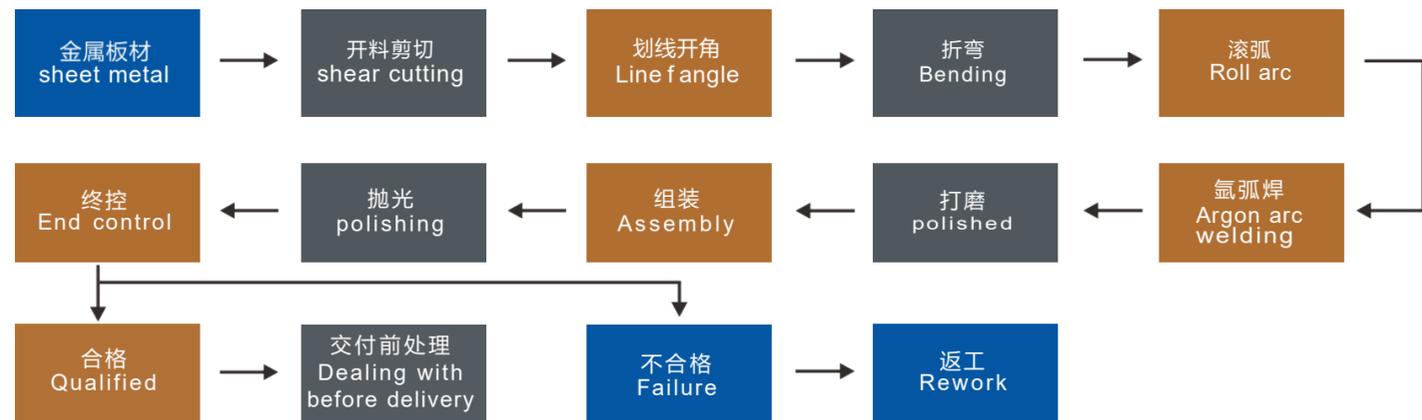

Foshan Zhonglong Aluminum Co., Ltd. is a production and manufacturing enterprise integrating research and development, design, manufacturing, and marketing. It is primarily dedicated to designing and producing high-end aluminum veneer for indoor and outdoor decoration of buildings, metal ceilings, column covers, and various decorative aluminum panels. Additionally, the company provides excellent services and related solutions, with a persistent pursuit to create high-quality artistic spatial environments for its customers.

The company strictly operates in accordance with the standards and requirements outlined in the various elements of the ISO9001:2000 quality assurance system, ensuring rigorous quality inspection and control throughout the production process. Adhering to the long-standing business philosophy of "quality first, integrity supreme, and top-notch service," the company is committed to building a premium brand. Equipped with advanced fully automated spraying equipment, state-of-the-art temperature-controlled furnaces, liquefied gas combustion systems, and German-sourced pre-treatment technology, including CNC laser cutting machines, CNC bending machines, CNC cutting machines, and tower-type CNC punching machines, the company boasts a production and processing capacity of over 500,000 square meters of fluorocarbon-coated aluminum curtain walls and 1,000,000 square meters of aluminum ceilings annually. It is considered one of the largest and most advanced enterprises in its field in China, offering top-notch services.

钣金工艺流程 SHEET METAL PROCESS FLOW

蜂窝板生产工艺流程 HONEYCOMB PANEL PRODUCTION WORKSHOP

ALUMINUM VENEER CURTAIN WALL SERIES 铝单板幕墙系列

铝单板幕墙采用优质高强度铝合金板材，其常用厚度为2.0,2.5,3.0，型号为3003状态为H24。其构造主要由面板、加强筋和角码组成。角码可直接由面板折弯、冲压成型，也可在面板的折边上铆装角码成型。加强筋与板面后的电焊螺钉联接，使之成为一个牢固的整体，极大增强了铝单板幕墙的强度与刚性，保证了长期使用中的平整度及抗震能力。如果需要隔音保温，可在铝板内侧安装高效的隔音保温材料。

Aluminum veneer curtain wall is made of high-quality and high-strength aluminum alloy plate with common thickness of 2.0, 2.5 and 3.0, model of 3003 and status of H24. Its structure is mainly composed of panel, stiffener and corner code. The corner code can be directly bent and pressed by the panel, or riveted on the folding edge of the panel. The reinforcing rib is connected with the electric welding screw behind the plate surface, which makes it a solid whole, greatly enhances the strength and rigidity of the aluminum veneer curtain wall, and ensures the flatness and anti-seismic ability in long-term use. If sound insulation and heat preservation are needed, efficient sound insulation and heat preservation materials can be installed inside the aluminum plate.

ALUMINUM VENEER
CLADDING COLUMN SERIES
铝单板包柱系列

铝单板包柱系列
ALUMINUM VENEER CLADDING COLUMN SERIES

圆形无缝包柱
Round Seamless Packed Column

圆形无缝包柱的应用常常有令人耳目一新的惊喜与视觉享受，它的身影常常出现在酒店大堂、大型车站、机场及各种展厅等公共场所中。并且不同场合给人的愉悦有所不同，也许与您的期遇，您会觉得是那么地简单，没有太多的深层元素，但是那么地自然，好像天主造物本应如此。

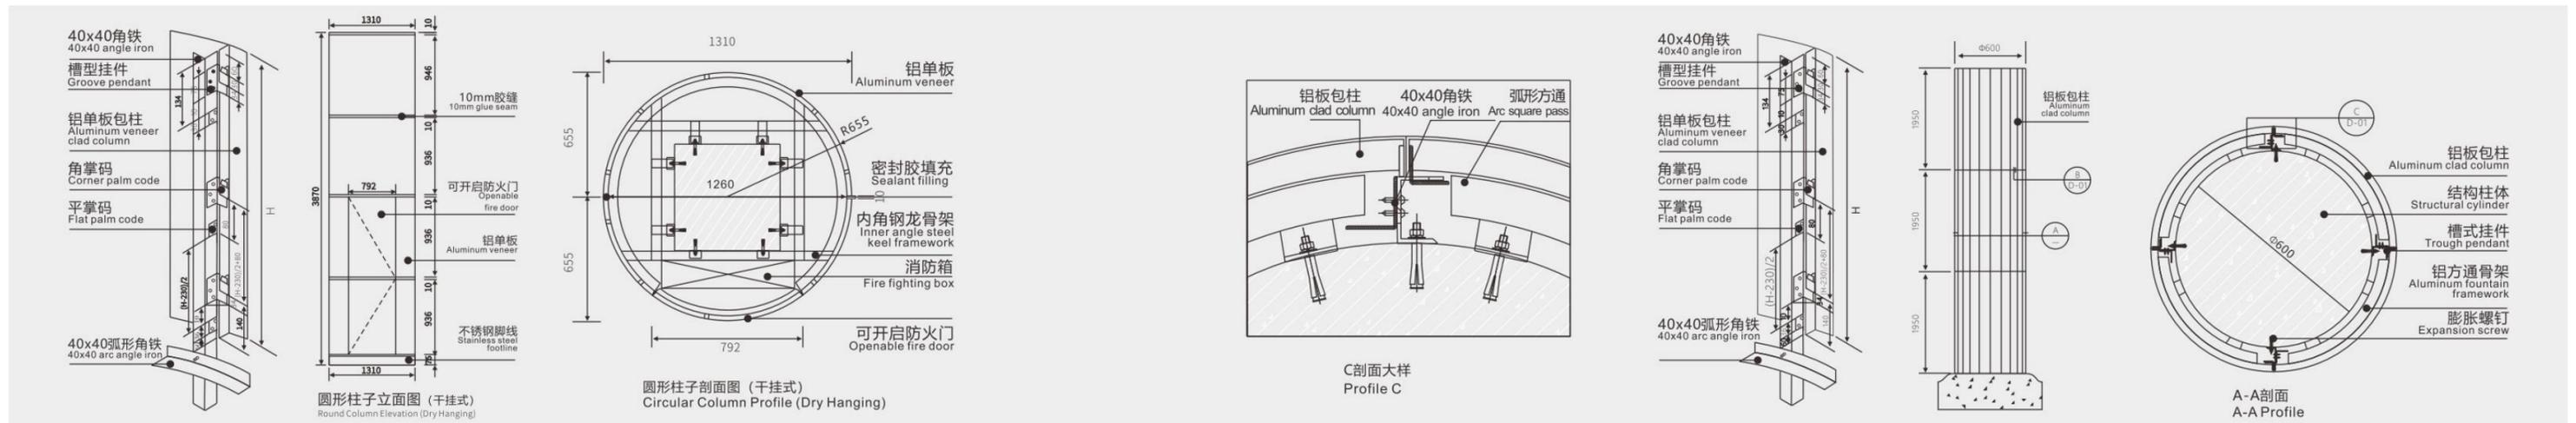

The application of circular seamless column is often refreshing surprise and visual enjoyment. It often appears in the hotel lobby, large stations, airports and various exhibition halls and other public places. And different occasions give people different pleasure, perhaps with your expectations, you will feel that it is so simple, not too many deep elements, but so natural, as if God should have created it.

圆形有缝包柱
Circular slotted wrapped column

圆形有缝包柱是把公众视觉立体化的一个基点，在建筑空间美学中，设计材料与造型的产生，不仅是某个意象不期而遇，更是灵感与现实的碰撞；并且可以肯定这种创意的应用也是可以持续延伸。

The circular suture column is a basic point of three-dimensional public vision. In the aesthetics of architectural space, the generation of design materials and shapes is not only an unexpected encounter of an image, but also a collision between inspiration and reality. And you can be sure that this kind of creative application can continue to extend.

ALUMINUM VENEER SQUARE COLUMN SERIES 铝单板方柱系列

铝单板方柱系列

ALUMINUM VENEER SQUARE COLUMN SERIES

方形无缝包柱 Square Seamless Packed Column

方形无缝包柱的应用为大型装饰空间提供了一个整体简洁的视觉空间；尤其是变幻莫测的建筑设计中，平整反而成了视觉另一缓冲点，常常给人们带来平凡的惊喜与享受！方形无缝包柱更多应用在大空间的建筑群里，缓冲大面积的空旷感，保留神秘感，体现设计的美妙。

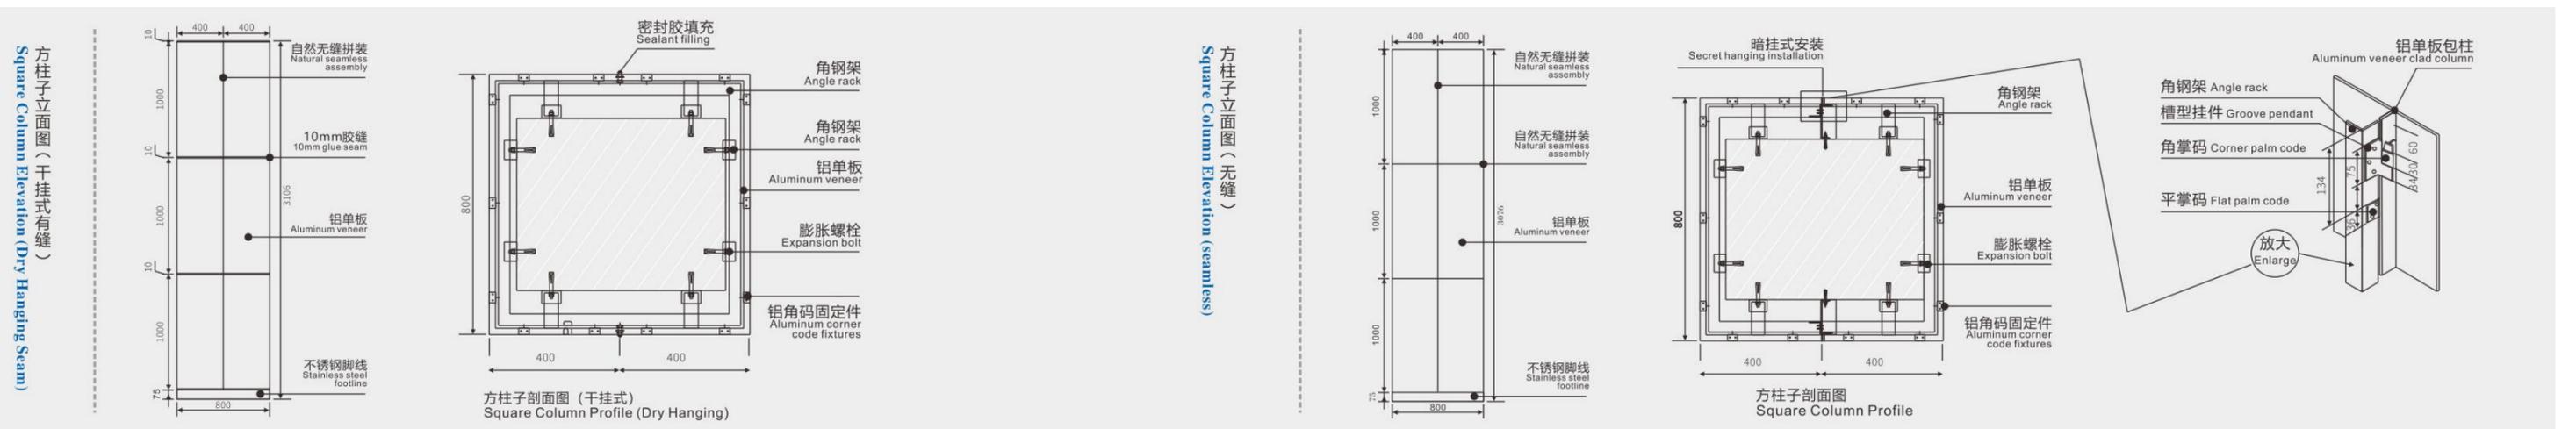

The square column, originally a space barrier, has become a beautiful landscape through the decoration of the designer, which is not only the charm of decoration, but also the credit of building materials; The square slotted wrapped column adds some unique visual highlights to the single wall, plays the function of decoration and brings more reverie space.

方形有缝包柱 Square slotted wrapped column

原本是空间障碍的方柱，通过设计师的装饰变成一道亮丽的风景线，这就是装修的魅力，也是建材的功劳；方形有缝包柱为单一的墙体增添几分独特的视觉亮点，起到了点缀装饰的功能，带来了更多的遐想空间。

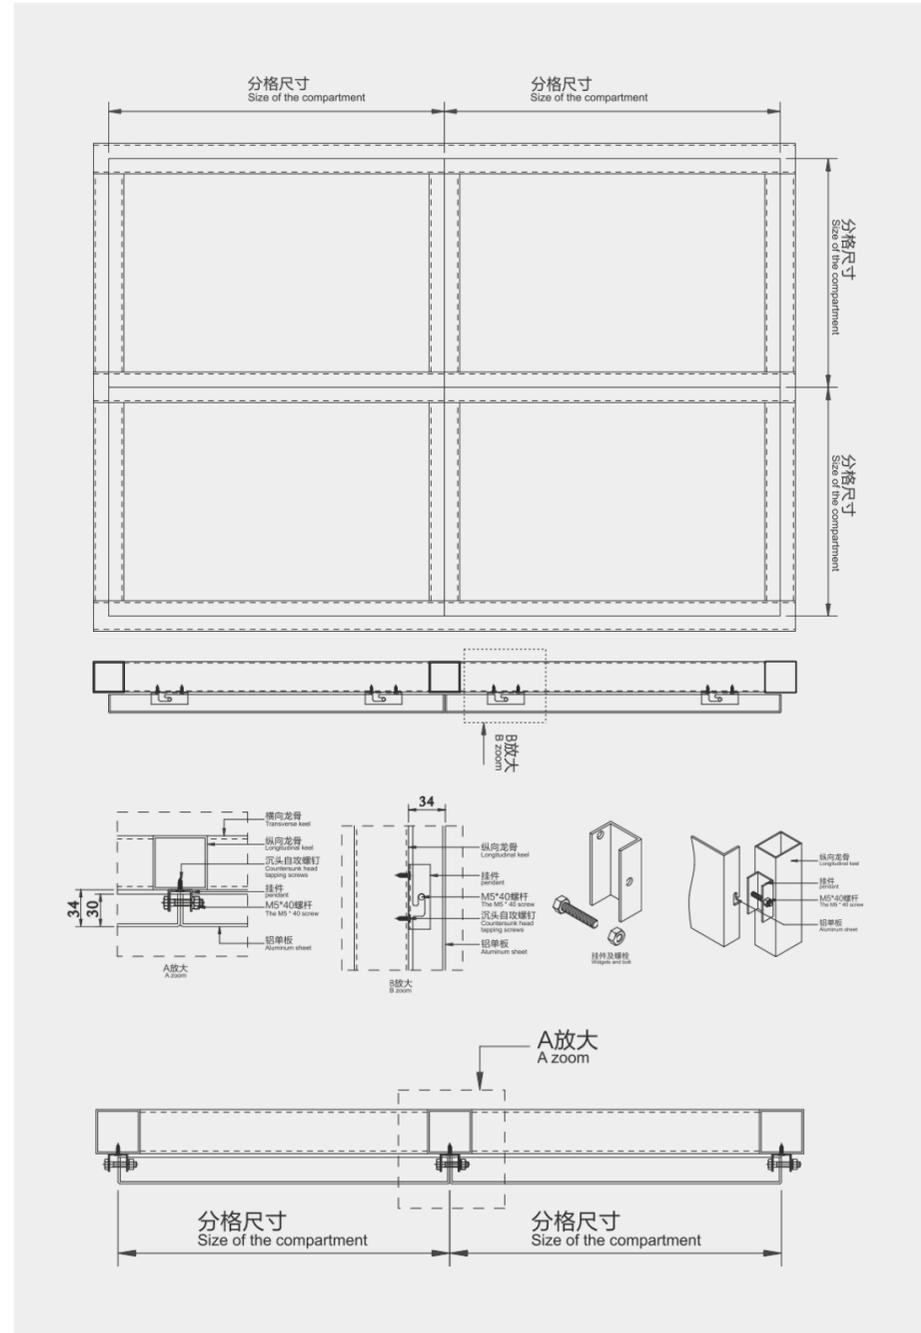

The square column, originally a space barrier, has become a beautiful landscape through the decoration of the designer, which is not only the charm of decoration, but also the credit of building materials; The square slotted wrapped column adds some unique visual highlights to the single wall, plays the function of decoration and brings more reverie space.

CLOSE FITTING ALUMINUM VENEER 密拼式铝单板

密拼铝单板刚性好、强度高，施工安装方便，可回收再处理，色彩可选择性广泛，可加工成多种创意造型，装饰效果好，具有耐腐蚀、耐污染性强、使用寿命长久等优良特点。适用场所：高级写字楼、走廊、车站、厂房、医院、会所、银行、商场、展览馆等。

The compact aluminum veneer has good rigidity, high strength, convenient construction and installation, can be recycled and reprocessed, wide color selection, can be processed into a variety of creative shapes, good decorative effect, corrosion resistance, strong pollution resistance, long service life and other excellent characteristics. Applicable places: high grade office buildings, corridors, stations, factories, hospitals, clubs, banks, shopping malls, exhibition halls, etc.

SLOTTED ALUMINUM VENEER 开缝式铝单板

开缝铝单板幕墙系统，是指在铝单板板块的接缝采用不打胶的工艺，通过开缝让铝单板背后的空气层能够顺畅的流通，可以起到良好的隔热及吸声效果，而且在空气流通的过程中可以将冷凝水挥发掉，由于接缝处采用不打胶的工艺，减少了铝单板的表面污染，使铝单板表面保持长期清洁。

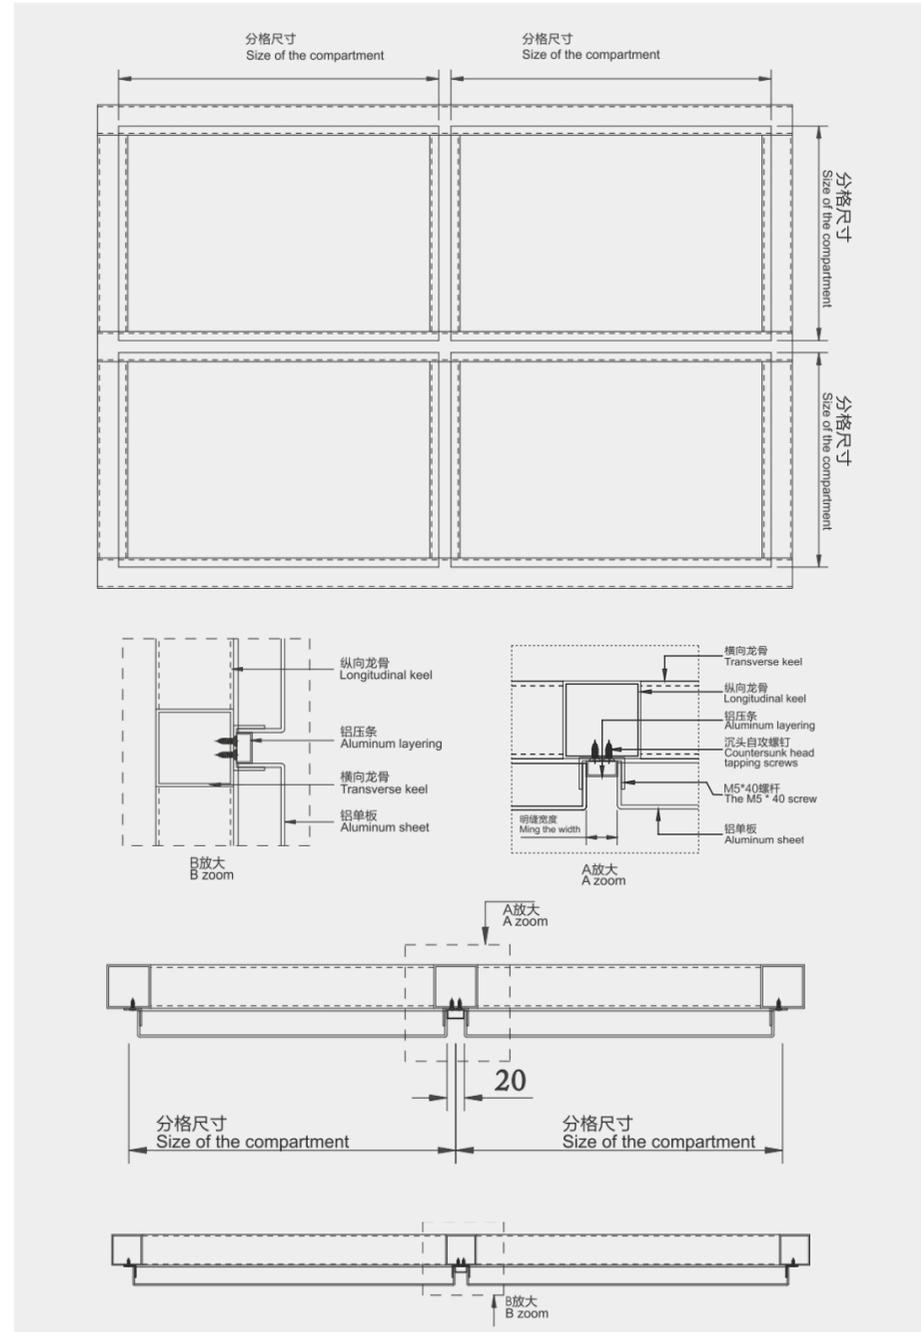

同时由于铝单板背后的空气层与室外空气是相通等压，从而防止雨水由于压力差进入室内，冷凝水和水量的渗漏水可以通过每层设置的排水板（兼作隔气板）分层排出，铝单板背后的空气层通过空气对流减少了热转换，在夏季，可以减少制冷成本，在冬季则可以大减少采暖费用。

适用场所：高级写字楼、走廊、车站、厂房、医院、会所、银行、商场、展览馆等。

Slotted single aluminum plate curtain wall system, refers to the process of glue in aluminum single plate joints, through the open air layer for every single aluminum plate behind the flows smoothly, can play a good thermal insulation and sound absorption effect, but also in the process of air circulation in the condensed water may be volatile. Because of the joint process with no glue, reducing the surface contamination of single aluminum plate, aluminum veneer surface to keep clean for a long time.

At the same time as the air layer and the outdoor air behind the single aluminum plate is the same equal to prevent rain due to the pressure difference of water leakage into the interior, condensed water and water can drain through each layer (a baffle plate) stratified discharge, air layer behind the single aluminum plate by air convection reduces the heat transfer. In the summer, can reduce the cost of refrigeration in the winter, can reduce the cost of heating.

Applicable places: high office building, corridor, station, factory building, hospital, club, bank, mall, exhibition hall, etc.

HYPERBOLIC ALUMINUM VENEER 双曲铝单板

本企业大胆探索，自主创新，利用蒙皮拉伸技术和三维建模原理，解决了铝单板行业的难点技术—双曲面铝单板的生产、设计工艺，成为国内为数不多的真正能批量生产双曲面铝单板和复杂异型板的企业之一，为设计师提供了更为广阔的想象和设计空间。

版面效果比常见的通过分割焊接产生的双曲面平整度好，安装效果比所谓的“以直代曲”等假双曲的弧线圆滑，充分展示了双曲面铝单板在金属幕墙上无可代替的独特魅力。

双曲铝单板应用领域：大型商业写字楼、市政办公项目、会展中心，大型场馆、博物馆、高级会所、医院综合楼、酒店大堂、火车站、地铁、机场等。

The enterprise has boldly explored and independently innovated, and solved the difficult technology in the aluminum veneer industry - the production and design process of hyperboloid aluminum veneer by using the skin stretching technology and three-dimensional modeling principle. It has become one of the few enterprises in China that can truly produce hyperboloid aluminum veneer and complex profiled plates in batches, providing designer with a broader imagination and design space.

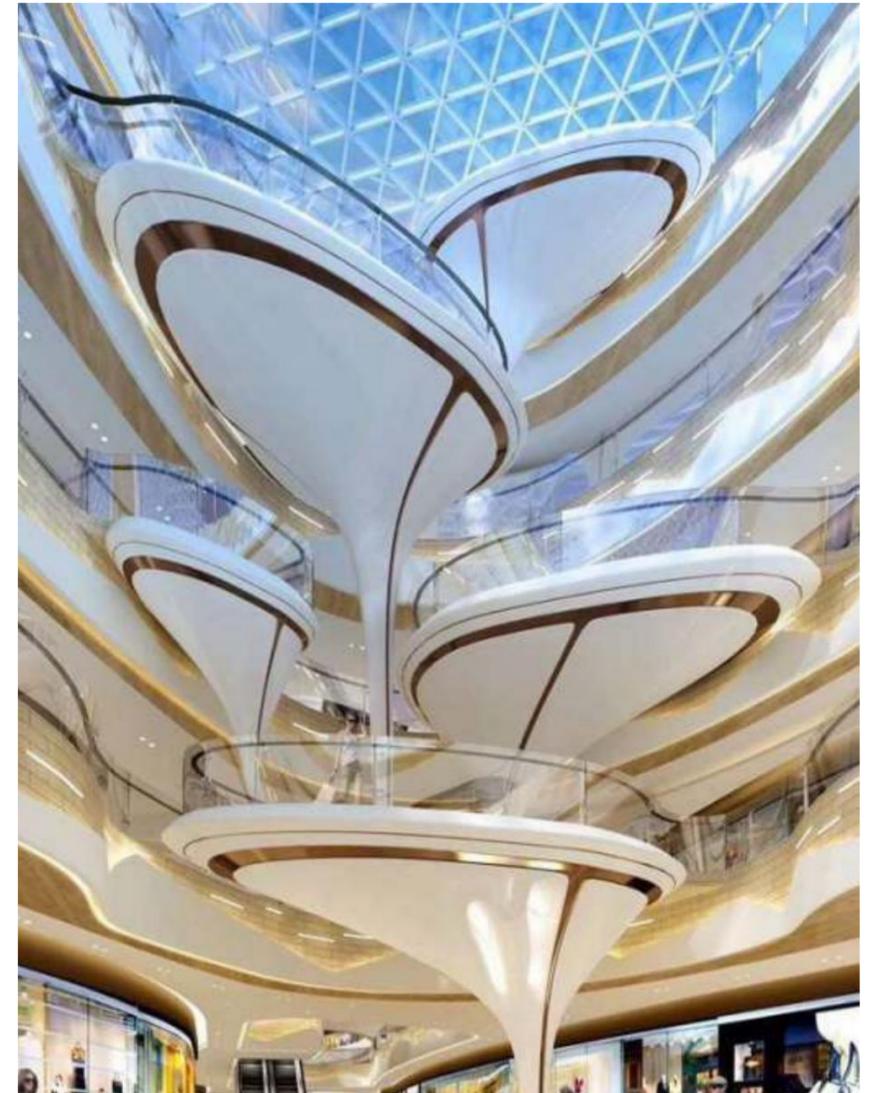

The layout effect is better than the flatness of the common hyperboloid plate produced by split welding, and the installation effect is smoother than the so-called "straight instead of curved" and other pseudo-hyperbolic arcs, fully demonstrating the unique charm of the hyperboloid aluminum veneer on the metal curtain wall.

Application fields of hyperbolic aluminum veneer: large commercial office buildings, municipal office projects, exhibition centers, large venues, museums, senior clubs, hospital complex buildings, hotel lobbies, railway stations, subways, airports, etc.

双曲铝单板室内应用

INDOOR APPLICATION OF HYPERBOLIC ALUMINUM VENEER

HYPERBOLIC ALUMINUM VENEER 双曲铝单板

双曲面铝单板产品造型奇特、工艺复杂，公司采用进口的万能成型机，配合专用数控双曲面软件生产出成品，产品精确度高，表面平滑可任意定制双曲面、球形面，制造出独特美观的立体造型。

双曲铝单板特点：

- 1、重量轻、刚性好、强度高。
- 2、耐高温、耐腐蚀、耐老化。
- 3、阻燃、隔音、隔热的效果好。
- 4、涂层均匀，色彩多样易加工、性能稳定、装饰性强。
- 5、施工安装方便、快捷可回收再利用，回收价值极高，有利环保。

The hyperboloid aluminum veneer products have strange shapes and complex processes. The company uses imported universal molding machines and special numerical control hyperboloid software to produce finished products with high accuracy and smooth surface. The hyperboloid and spherical surfaces can be customized at will to produce unique and beautiful three-dimensional shapes.

Features of hyperboloid aluminum veneer:

1. Light weight, good rigidity and high strength.
2. High temperature resistance, corrosion resistance and aging resistance.
3. The effect of flame retardant, sound insulation and heat insulation is good.
4. The coating is uniform, colorful and easy to process, with stable performance and strong decoration.
5. The construction and installation are convenient, fast and recyclable, with high recovery value, which is beneficial to environmental protection.

双曲铝单板室外应用

OUTDOOR APPLICATION OF HYPERBOLIC ALUMINUM VENEER

MOLDED ALUMINUM VENEER 造型铝单板

专业设备及工艺人才以满足专业的设计追求，非标生产就是根据设计方案的需求，结合金属加工的综合工艺，定制构及效果各异的造型金属板材，令建筑装饰达到完美和功能双兼得；专业的非标尺寸及造型加工，令设计需求得以最大程度的发挥，体现独一无二的设计风格：造型天花融合了现代装饰的使用功能和极具时代感的效果，已成为金属装饰的新宠。

适用场所：大型商业写字楼、市政办公项目、会展级会所等。

professional equipment and technology personnel to meet the pursuit of professional design, non-standard production is based on the needs of the design scheme, combined with the comprehensive process of metal processing, custom-made modeling metal plates with different structures and effects, so as to achieve perfect architectural decoration and function; professional non-standard size and modeling processing can maximize the design requirements and reflect the unique design style: the modeling ceiling integrates the use function of modern decoration and the effect of great sense of the times, and has become a new favorite of metal decoration.

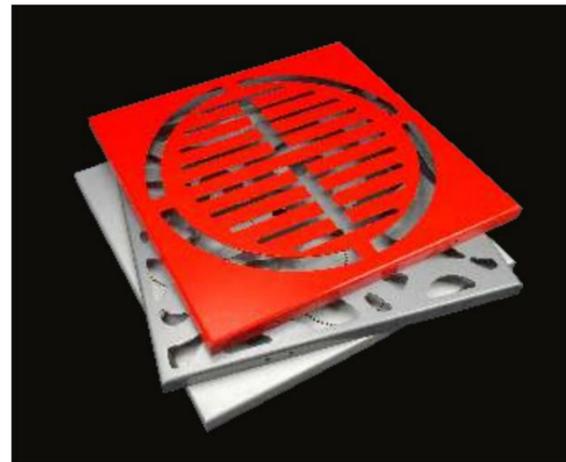

Applicable places: large commercial office buildings, municipal office projects, exhibition level clubs, etc.

CARVED ALUMINUM VENEER 雕花铝单板

艺术雕刻铝板凭着先进的生产技术设备，追求精致完美，力求成为个性化和艺术化的新一代主流产品。环保无毒，完全防火，款式多样化，图案可根据个人风格定做，尽显个性化；表面雕刻立体感强；抗静电不吸尘且容易清洗等。且安装简单、易装易拆、维修方便。将龙骨按水平线吊装好，把板扣上去即可，每块板都是独立的，铝板固定于龙骨扣齿上并可以单独拆卸，保养简便。

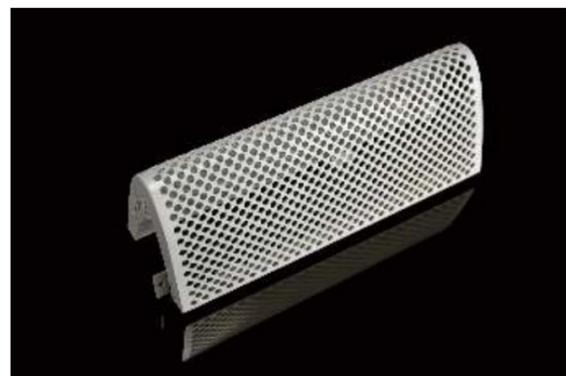

with advanced production technology and equipment, art carving aluminum plate pursues refinement and perfection, and str ives to become a new generation of persona liz ed and artistic mainstream pro ducts. Environmental protection, non-toxic, complete fire prevention, diversified styles, patterns can be customized according to persona l style, showing personalization; Surface carving, strong body feeling; Antistatic, no dust collection and easy to clean. The utility model has the advantages of simple installation, easy assembly and disassembly and convenient maintenance. Hoist the keel according to the horizontal line and buckle the plate. Each plate is independent. The aluminum plate is fixed on the keel buckle and can be dis assembled separately. The maintenance cylinder is convenient.

PUNCHED ALUMINUM VENEER 冲孔铝单板

时尚与个性并存，富有艺术特色。配以不同颜色和形状各异的冲孔，则会营造出独特的氛围，更会提升建筑的层次感和现代感。冲孔板一般采用优质1100、3003、5005单层铝合金为基材。表面涂层分为氟碳喷涂，粉末喷涂，聚酯漆喷涂。铝板表面涂层性质严格按客户要求，颜色可由公司负责提供标准色卡供客户选择。冲孔铝单板产品厚度主流的有1.5mm、2.0mm、2.5mm、3.0mm、4.0mm等各种规格，成型铝单板最大尺寸可达1500×4000mm。产品优点：外观优雅，防火防潮，安装方便，经久耐用，吸音隔音，不受正负压影响，有利于通风口或其他设备的散热，透光照明等。

Fashion and individuality coexist, full of artistic characteristics. Punching with different colors and shapes will create a unique atmosphere and enhance the sense of hierarchy and Modernity of the building. The punching plate generally adopts high-quality 1100, 3003 and 5005 single-layer aluminum alloy as the base material. The surface coating is divided into fluorocarbon spraying, powder spraying and polyester paint spraying. The coating properties of aluminum plate surface are strictly in accordance with the customer's requirements, and the color can be selected by the company by providing the standard color card. The mainstream thickness of punched aluminum veneer products are 1.5mm, 2.0mm, 2.5mm, 3.0mm, 4.0mm and other specifications, and the maximum size of formed aluminum veneer can reach 1500 x 4000mm. Product advantages: elegant appearance, fire and moisture prevention, convenient installation, durable, sound absorption and sound insulation, not affected by positive and negative wind pressure, conducive to heat dissipation, light transmission and lighting of vents or other equipment.

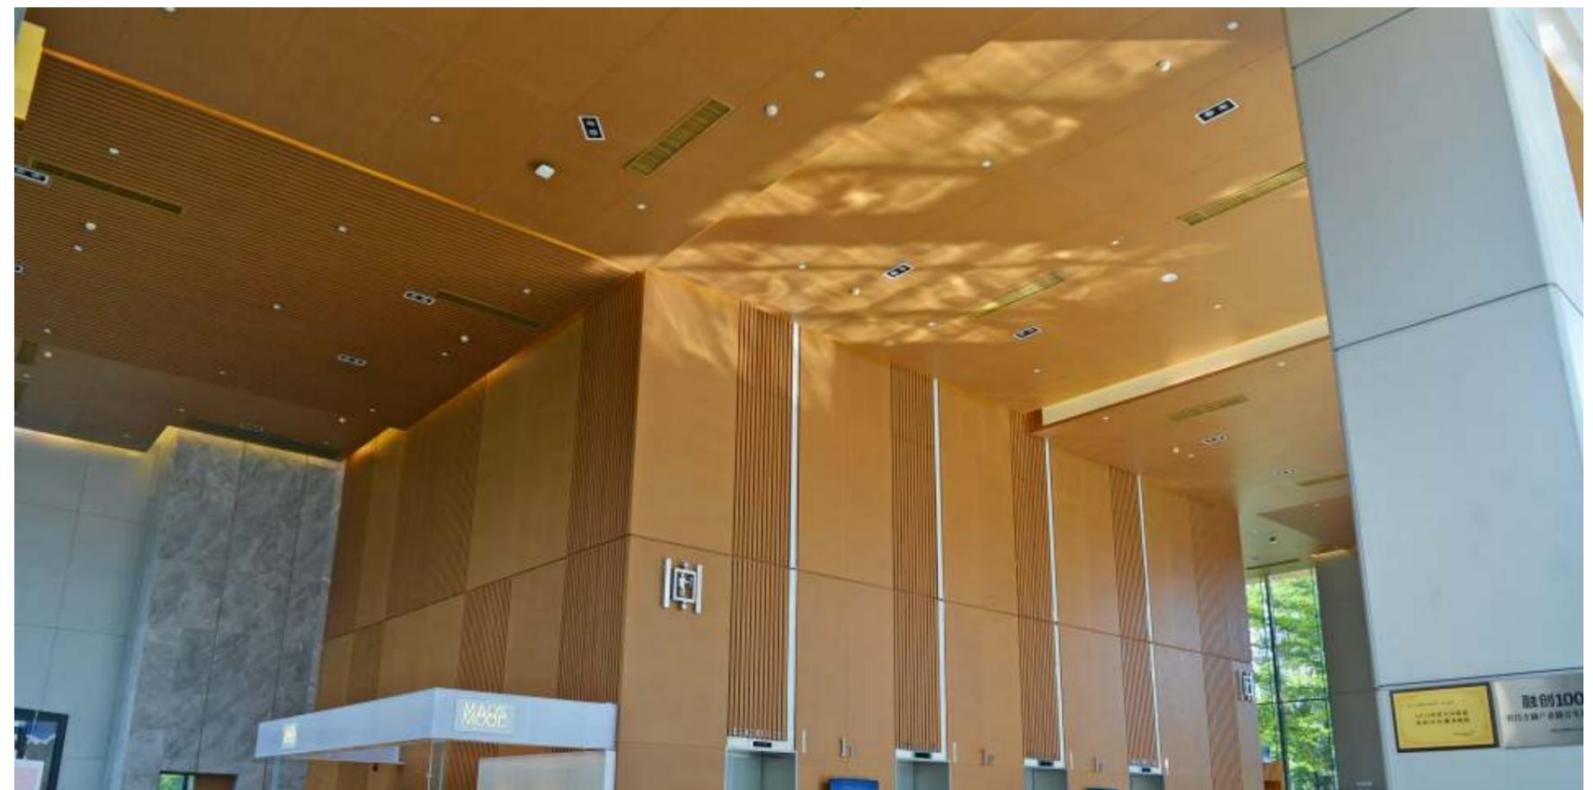

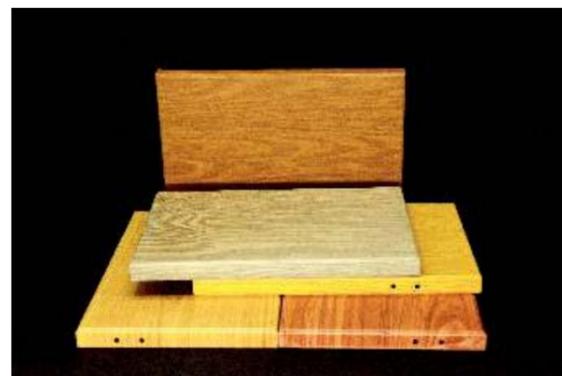

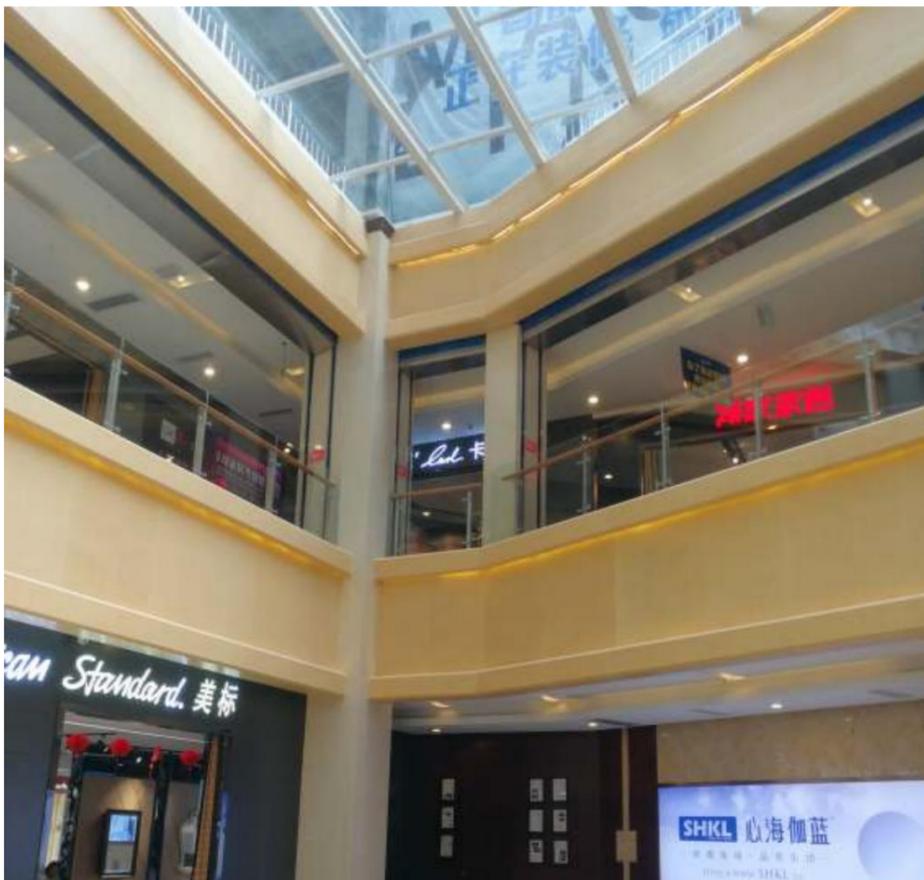

IMITATION WOOD GRAIN ALUMINUM VENEER 仿木纹铝单板

当今时代，人们追求回归大自然的要求与崇尚绿色环保的潮流构成了装饰世界的新趋势。仿木纹铝板是近代欧洲风行的建筑材料，仿木纹铝板经典优雅、自然的风格成为了高贵时尚的代表产品，更以其逼真的天然木材视觉效果和立体木纹触感效果成为了最引领时尚潮流的先锋，而且，具有木纹效果的铝板代替木材，更为保护我们人类赖以生存的绿色世界做出新的贡献。

用途：1、氟碳滚涂用于室外（永不褪色）；2、木纹转印用于室内；

Nowadays, people's pursuit of returning to nature and the trend of advocating green and environmental protection constitute a new trend of decorating the world. Imitation wood grain aluminum plate is a popular building material in modern Europe. The classic, elegant and natural style of imitation wood grain aluminum plate has become a representative product of noble fashion. It has become the pioneer leading the fashion trend with its realistic natural wood visual effect and three-dimensional wood grain tactile effect. Moreover, aluminum plate with wood grain effect replaces wood, and make new contributions to protecting the green world on which our mankind depends.

Usage: 1. Fluorocarbon roll coated outdoor (never fade); 2. Wood grain transfer printing is used indoors;

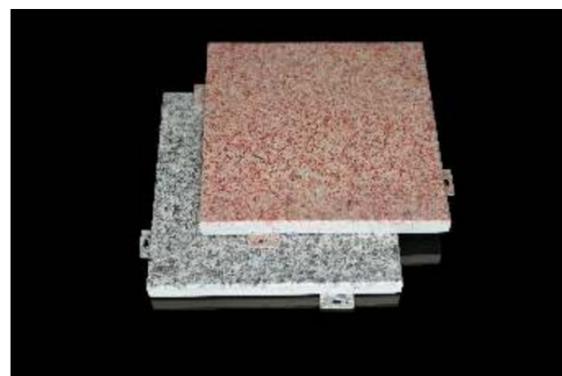

IMITATION STONE GRAIN ALUMINUM VENEER 仿石纹铝单板

当今时代，人们追求回归大自然的要求与崇尚绿色环保的潮流构成了装饰世界的新趋势。在此趋势的推动下，催生了铝型材表面装饰的最优秀代表—仿石纹新型铝材。仿石纹铝材经典优雅、自然的风格成为了高贵时尚的代表产品，更以其逼真的天然石材视觉效果和立体石纹触感效果成为了最引领时尚潮流的先锋，而且，具有石纹效果的铝材代替石材，更为保护我们人类赖以生存的绿色世界做出新的贡献。本产品选料优良，附着力强，色泽光亮、不褪色、耐酸碱、抗腐蚀，符合欧洲环保标准。

Nowadays, people's pursuit of returning to nature and the trend of advocating green and environmental protection constitute a new trend of decorating the world. Driven by this trend, the best representative of aluminum profile surface decoration -stone like new aluminum material has been born. The classic, elegant and natural style of imitation stone grain aluminum has become a representative product of noble fashion. It has become the pioneer of the most leading fashion trend with its realistic natural stone visual effect and three-dimensional stone grain tactile effect. Moreover, aluminum with stone grain effect replaces stone, and makes new contributions to protecting the green world on which our human beings depend.

This product has excellent material selection, strong adhesion, bright color, non fading, acid and alkali resistance, corrosion resistance, and conforms to European environmental protection standards.

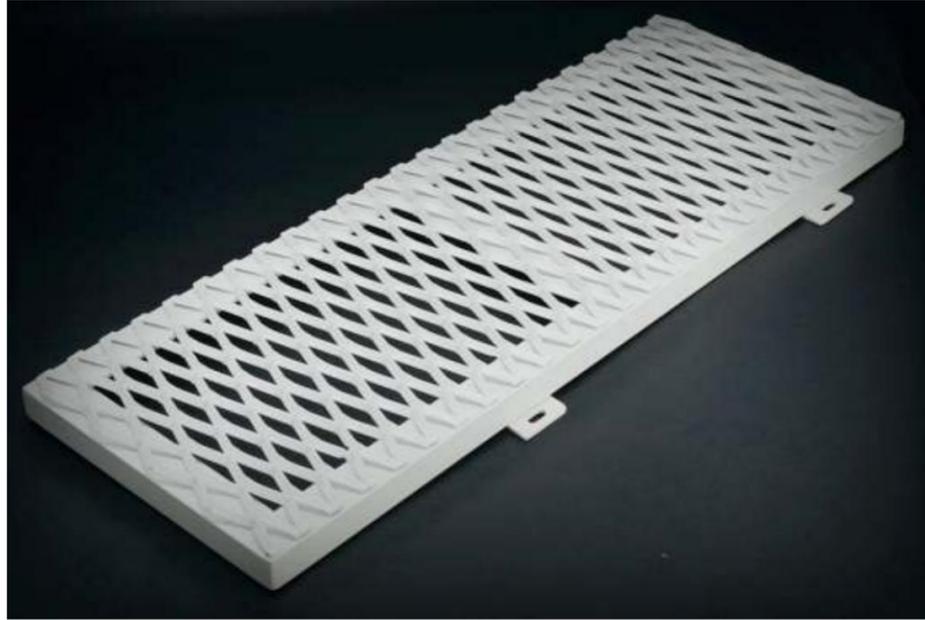

METAL TENSILE MESH PLATE 金属拉伸网板

拉伸网板天花系列是本公司推出的新品之一，它以独特的造型和时尚的流线感为设计师提供了广阔的设计空间，此天花有很好的立体空间效果，通过合适的角度可现宛如天幕状的效果，是现代大型建筑的精选之一。

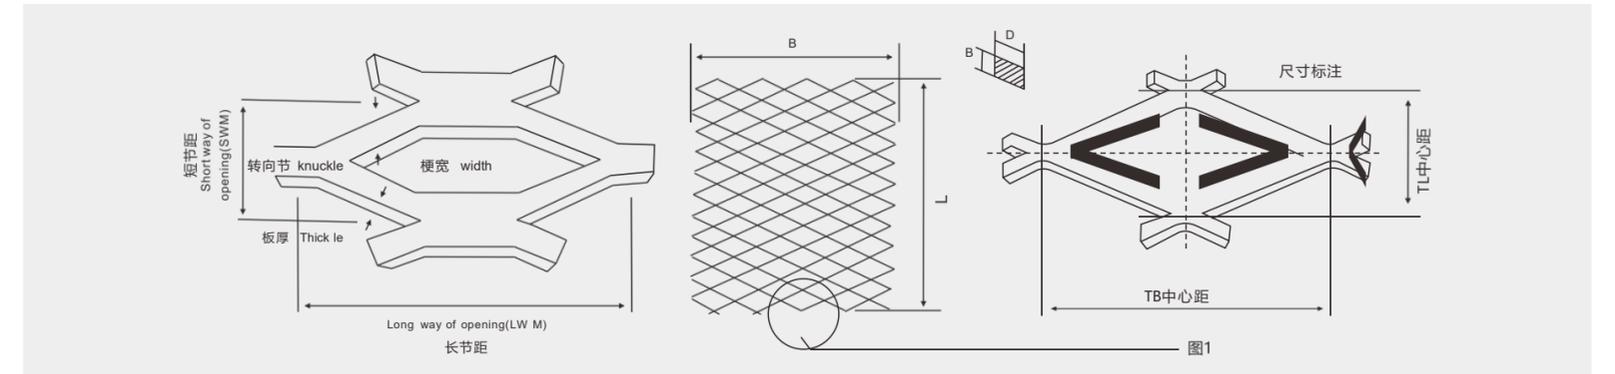

本企业最早将拉伸网板吊顶引入大型高级装饰场所中，改变人们对筛网的传统认识。通过筛网的独特网孔，很好地吧灯具、送风口和消防喷洒等功能设施隐藏于天花板背后，营造出别具一格的装饰风格。

screen ceiling series is the company la unched the new one, it to streamline the unique styling and fashion sense provides a vast design space for the designer, the smallpox has good effect of three- dimensional space, through the right angle now like a tent like effect, is the large modern building featured one of.

The company will be the fi rst screen ceiling introduces large high- grade decoration places, change th e traditional understanding of the people on the screen. Through the unique mesh screen, a good to hide at the back of the ceiling lamps and lanterns, supply air and fire sprinkler facilities, and other functions, creat ea unique decorative style.

筛网规格示意图
screen specification schematic diagram

MODELING ALUMINUM SQUARE SERIES 造型铝方通系列

造型铝方通是U型铝方通和型材铝方通推出市场之后，随着市场中消费者的个性化需求而量身打造的一款弧形方通。造型铝方通具有起伏的弧度，安装时采用不同的颜色搭配可以营造出和普通铝方通所不同的效果。同时，由于铝方通是通透式的，可以把灯具，空调系统，消防设备置于天花板内，以达到整体一致的完美视觉效果。铝方通安装简单，维护同样也很方便，由于每条铝方通是单独的，可随意安装和拆卸，无需特别工具，方便维护和保养。

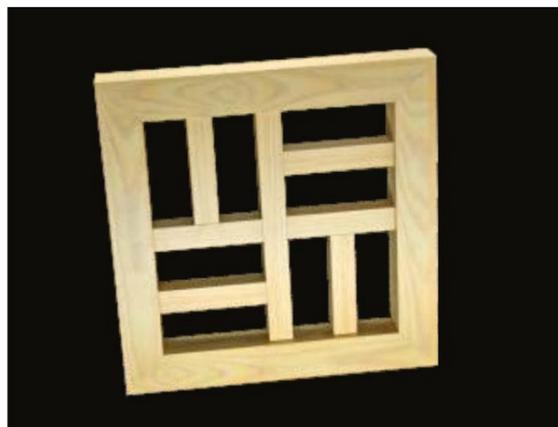

Arc shaped aluminum square tube is U-shaped aluminum Fangtong aluminum Fangtong profile s and the market, with the individual needs of consumers in the market and tailored a curved side pass. Arc square pass with the ups and downs of the arc, the installation of different colors can be used to create a different and ordinary aluminum square pass by the different effects. At the same time, because the aluminum side is transparent, can put the lamp, air conditioning system, fire equipment in the ceiling, in order to achieve the perfect visual effect of the whole. Aluminum side through the installation is simple, maintenance is also very convenient, as each of the aluminum side pass is separate, can be arbitrarily installed and disassembled, no special tools to facilitate maintenance and maintenance.

ALUMINUM WINDOW SERIES 铝窗花系列

铝窗花的材质具有柔软性好、弹性大、抗拉性强、不易褪色，硬度和光滑程度强、韧性强、延展性好，设计时尽可依着设计师的艺术匠心，充分发挥想象力，加工成各种曲线多姿，弧形优美的造型和款式。铝窗花现已为时尚装饰的重要组成部分，铝窗花一般陈设于室内外的显著位置，起到分隔、美化、挡风、协调等作用。铝窗花与时尚家具相互辉映，相得益彰，浑然一体，成为家居装饰不可分割的整体，而呈现出一种前卫、时尚元素。

The material of aluminum window flower has good softness, large elasticity, strong tensile strength, not easy to fade, strong hardness and smoothness, strong toughness and good ductility. When designing, we can make full use of the designer's artistic ingenuity, give full play to the imagination, and process it into various curved, curved and beautiful shapes and styles. Aluminum window flower has become an important part of fashion decoration. Aluminum window flower is generally displayed in a prominent position inside and outside the room, which plays a role of separation, beautification, wind resistance, coordination, etc. Aluminum window and fashion furniture reflect each other, complement each other, and become an integral part of home decoration, which presents an avant-garde and fashion element.

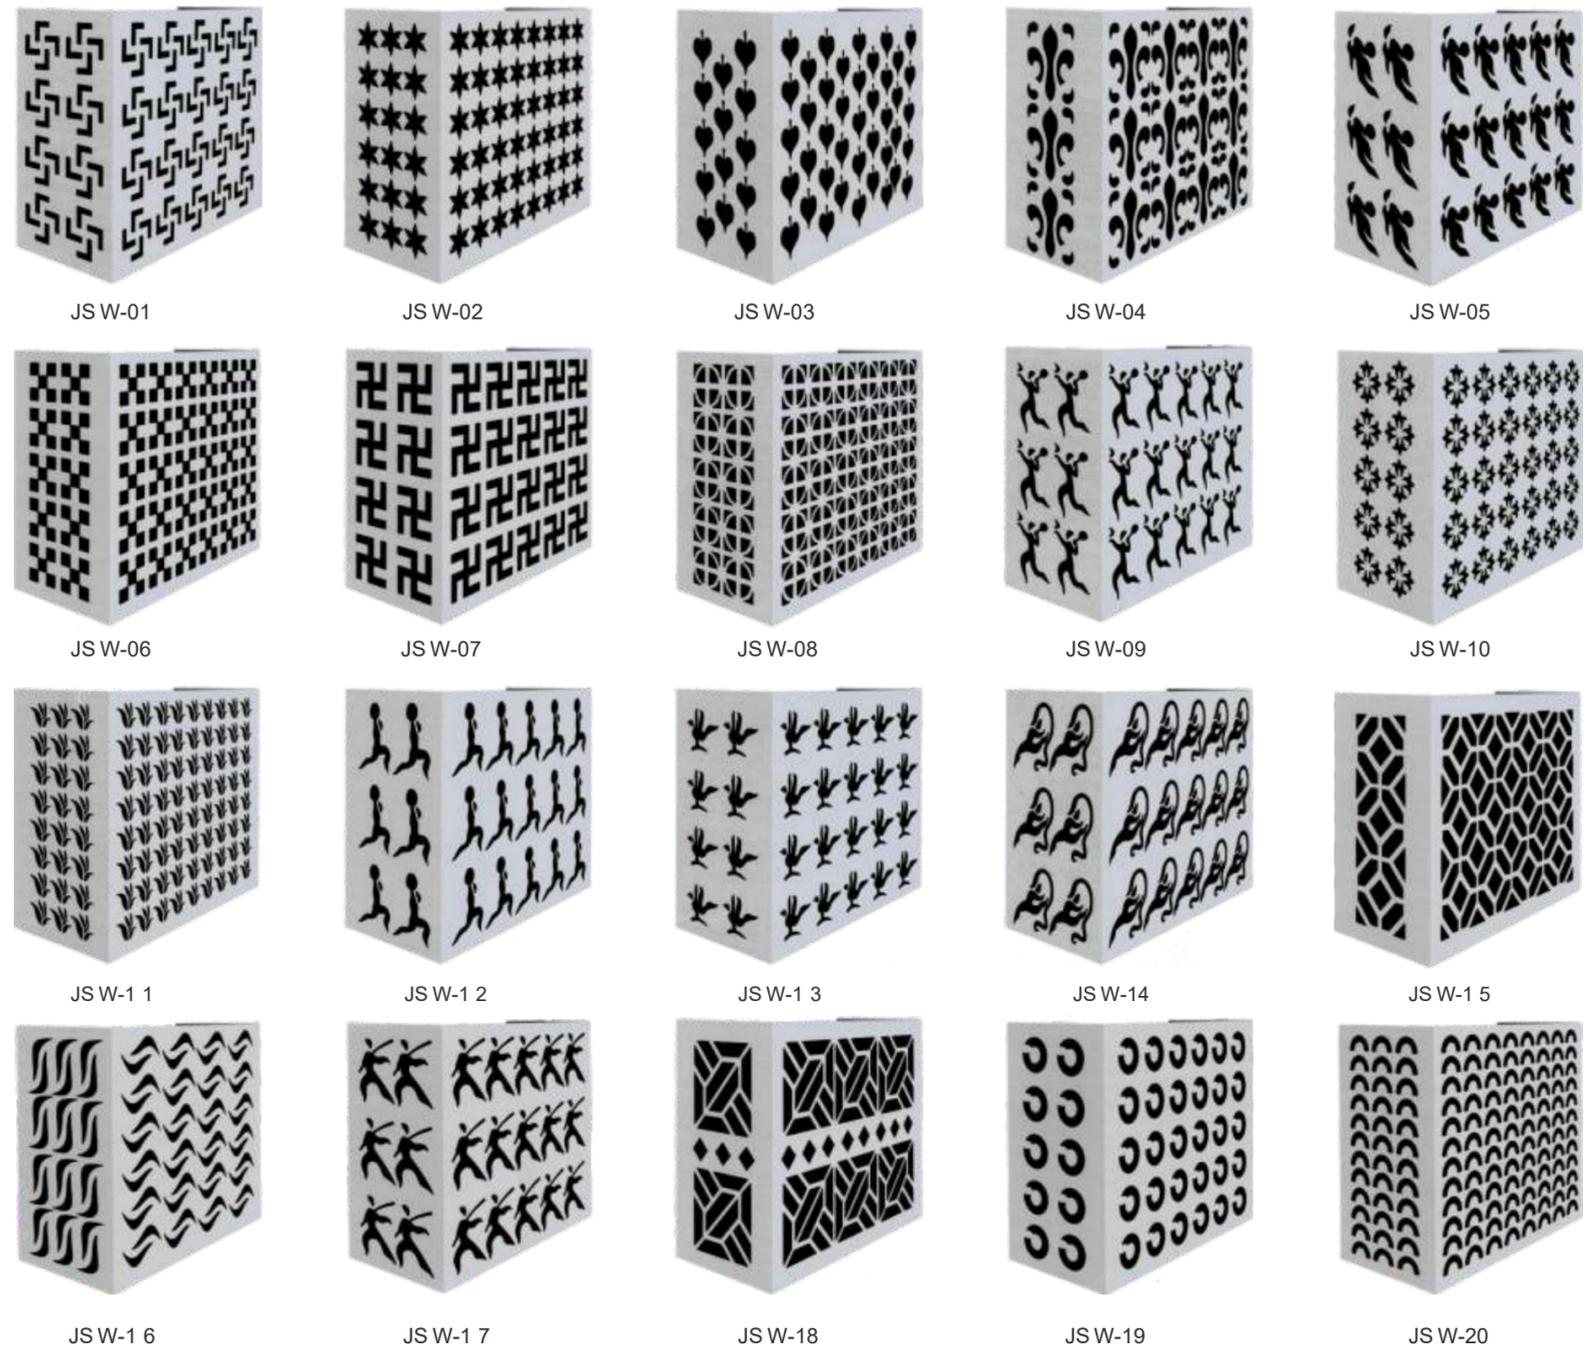

铝窗花应用 APPLICATION OF ALUMINUM WINDOW

AIR CONDITIONING COVER SERIES 空调罩系列

安全保障: 空调罩安装方便, 而且不会受强风影响而出现的脱落现象。
自动清洁: 铝质空调罩具有自洁性, 能够随雨水的冲刷而自动干净。
设计独特: 铝质空调罩款式丰富多样, 外形美观, 独特的设计更好的把空调保护、装饰起来, 起到装饰、防盗、防水、防晒的效果。
抗风性能: 大面积的镂空有利于气流的流动, 使百叶空调外机罩对空调外机散热的阻挡因素降到最低, 同时减少风力的作用力, 增强了铝质空调罩的抗风性能。
超长寿命: 空调保护罩主体结构根据空调外机用2.5mm的整块铝质板冲压钣金而成, 往折角处采用加强筋进行加固。并且在内部中间位置同样采用了加强筋来加固, 能有效延长空调外机罩的使用寿命!

safety guarantee: the airconditioner cover is easy to install and will not falloff due to strong wind.
Automatic cleaning: The aluminum air conditioner cover has self-cleaning property, which can automatically clean with the rain.
Unique design: the aluminum air conditioner cover has a variety of styles and beautiful appearance. The unique design can better protect and decorate the air conditioner and play the role of decoration, anti-theft, waterproof and sunscreen.
Wind-resistance performance: large area of hollowing is conducive to the flow of air flow, which minimizes the blocking factor of the outer cover of the louver air conditioner to the heat dissipation of the outer unit of the air conditioner, reduces the force of the wind, and enhances the wind-resistant performance of the aluminum air conditioner cover.
Ultra-long service life: the main structure of the air conditioner protective cover is made of 2.5mm aluminum sheet metal stamped by the outer unit of the air conditioner, and reinforced with stiffeners at the corners. In addition, reinforcing ribs are also used in the middle of the interior, which can effectively extend the service life of the outer cover of the air conditioner!

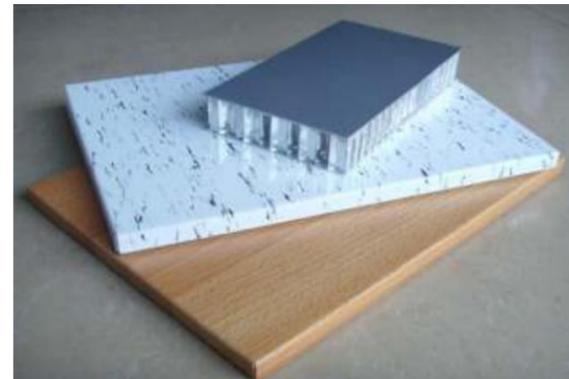

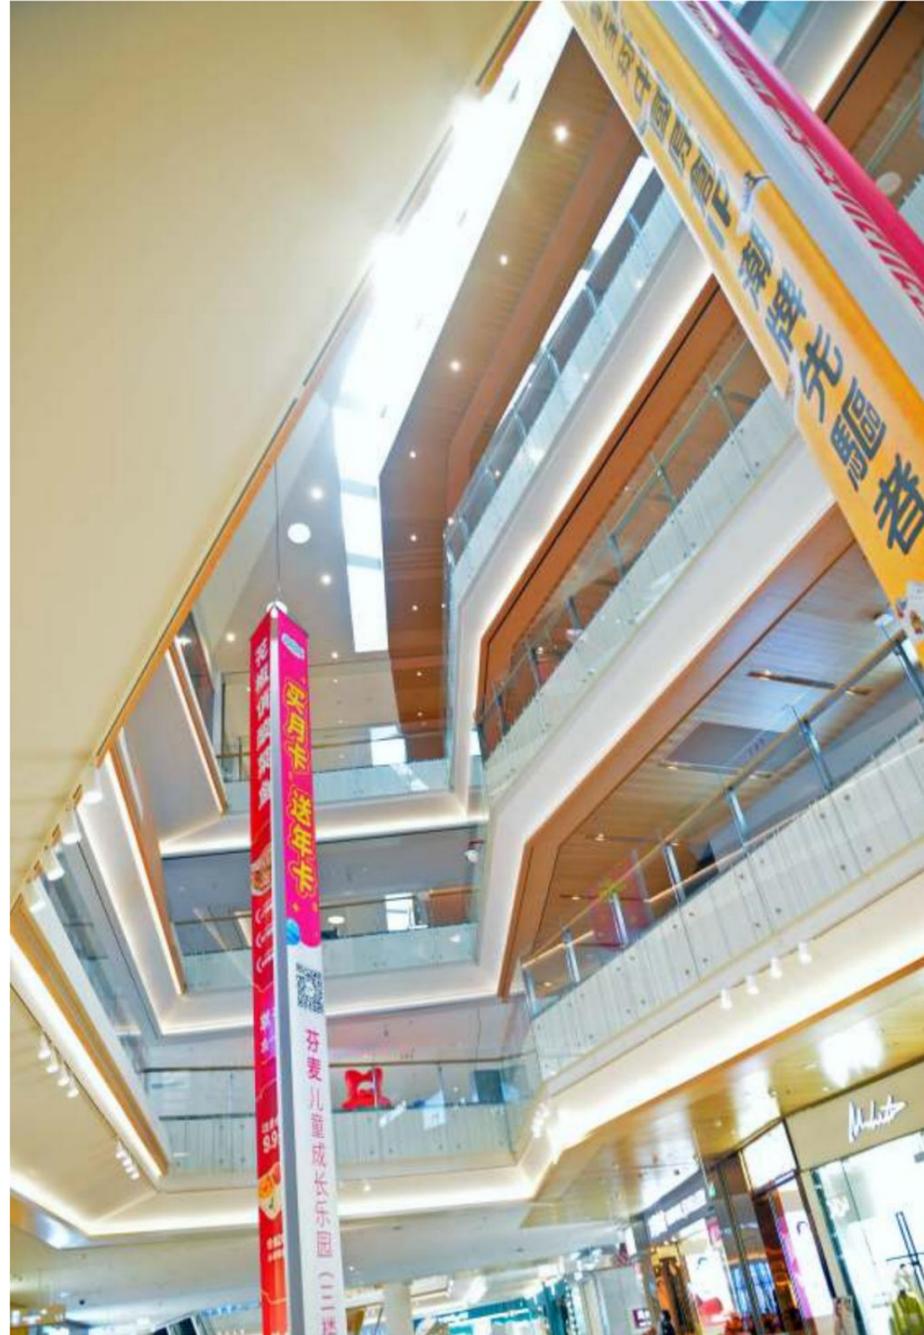

ALUMINUM HONEYCOMB PANEL SERIES 铝蜂窝板系列

铝蜂窝板是引进国外先进的复合设备，采用热熔性粘接剂研制而成的一种全新的复合材料，克服了传统蜂窝板粘接层脆性，抗撕裂程度和抗冲击性低、加工性差、成本高的缺点，从而开创了铝蜂窝板得到广泛应用的新局面。

铝蜂窝板符合绿色建材定义，被称为“二十一世纪最佳铝幕墙建材”。隔音、隔热、防火、防震功能突出。结构稳定，抗风压佳板面平整度极好。安装维护简便灵活，降低施工和维护成本。特殊颜色、形状的蜂窝板型也可定做。

Aluminum honeycomb panel is a new composite material developed by introducing foreign advanced composite equipment and using hot-melt adhesive. It overcomes the shortcomings of traditional honeycomb panel, such as brittleness of adhesive layer, low tear resistance and impact resistance, poor processability and high cost, thus creating a new situation of wide application of aluminum honeycomb panel.

Aluminum honeycomb panel is in line with the definition of green building materials, which is called "the best aluminum curtain wall building materials in the 21st century". Sound insulation, heat insulation, fire protection and shockproof functions are outstanding. Stable structure, good wind pressure resistance, excellent flatness. The installation and maintenance are simple and flexible, and the construction and maintenance costs are reduced. Special color and shape of honeycomb panel can also be customized.

ALUMINUM HONEYCOMB PANEL SERIES 铝蜂窝板系列

防水结构工艺 Waterproof structure of process

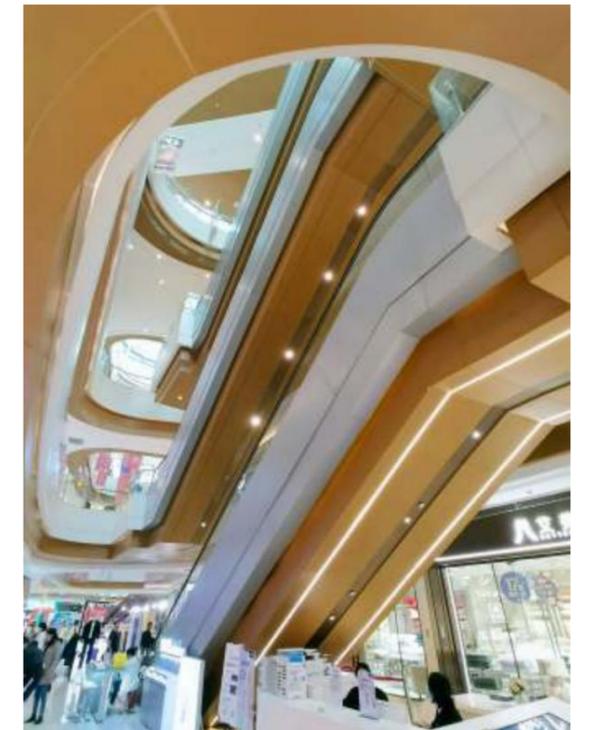

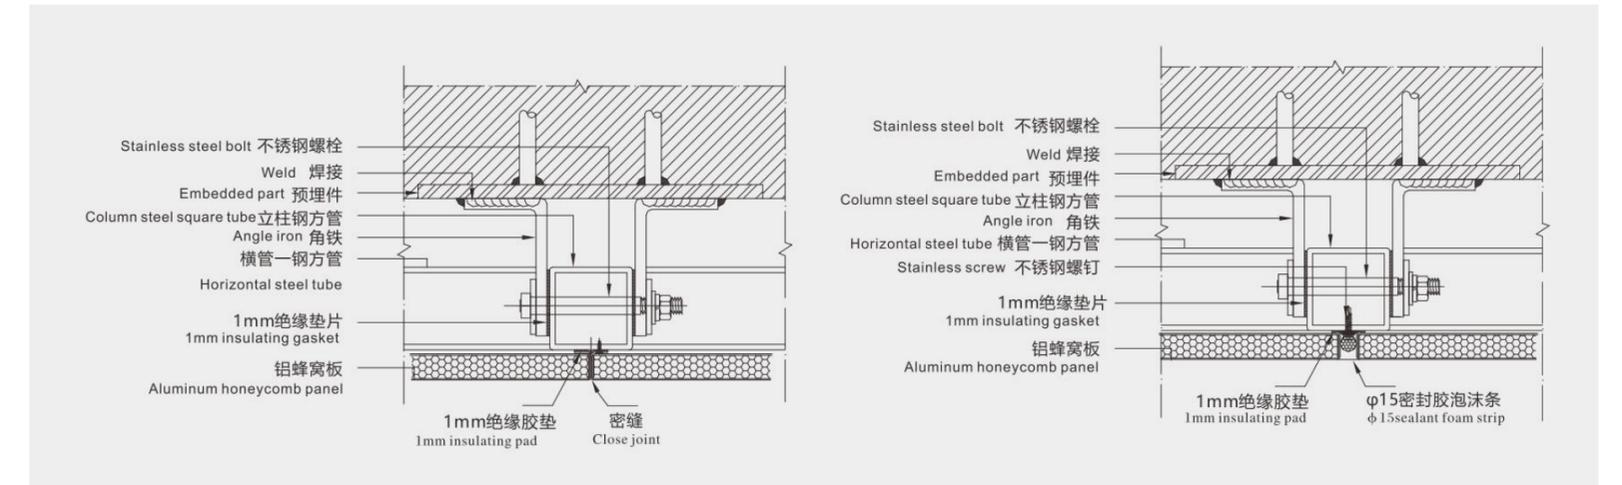

- 表面铝板采用3003铝合金板材，由于铝板板材具有防水作用，其表面经过氟碳处理后，具有抗风化、防化学腐蚀、耐气候等。
 - 周边采用密封型铝型材和铝板牢固结合，使其起到防雨水渗透作用。
 - 为了更好地起到防水作用，在安装过程中采用硅铜耐候胶和插接安装方式，使其达到最佳的防水效果。
- The surface aluminum board adopts 3003 aluminum alloy plate. Due to the waterproof function of the aluminum plate, the surface can be resistant to weathering, chemical corrosion and wicked climate after fluorocarbon treatment.
 - Airproof aluminum profile and aluminum board are combined firmly around to withstand rainwater penetration.
 - Silicone weather sealant and pinboard installation are utilized to ensure the best waterproof effect.

WOOD HONEYCOMB PANEL 木材蜂窝板

天然木皮来源于公司满怀着对天然木材热情,为保护生态环境不受破坏,坚持选择来自于再造林地区的天然木材,并得到原产地有关部门的审核认证。天然木皮的纹路比较深且细腻,所使用的木皮厚度大于0.5mm;色泽呈自然,深浅有致;边角处工艺一流,无起皮、翘角的现象出现。另外可以根据客户的需求选择染色木皮、竹板木皮、组合木皮(科技木皮)等表材,在设计应用上更能体现个性及风格,为建筑装饰更显风采。

The natural wood bark comes from the company's enthusiasm for natural wood. In order to protect the ecological environment from damage, the company insists on selecting natural wood from reforestation areas, which has been reviewed and certified by relevant departments of origin. The grain of natural veneer is deep and fine, and the thickness of veneer used is greater than 0.5mm; The color is natural and light; The process at the corners is first-class, and there is no peeling and angle warping. In addition, dyed veneer, bamboo veneer, combined veneer (science and technology veneer) and other surface materials can be selected according to the needs of customers, which can better reflect the personality and style in design and application and show more style for architectural decoration.

PROTECTION AND BRIGHT COLORS

STONE HONEY COMB BOARD 石材蜂窝板

超薄石材蜂窝板是一种新型建筑材料，经过专用粘合剂粘接复合而成。有比普通天然石材更好的抗冲击性，每平方米仅为8~11千克，是普通天然石材重量的1/7，抗压强度却是它的3~5倍，完全克服了天然石材重量大、易碎等缺陷，提供了一种性能更为优异和应用领域更为广泛的新一代建筑材料。

超薄石材蜂窝复合板就是把3mm~5mm左右的石材薄板与铝蜂窝基材通过胶粘剂复合到一起，既节省了石料又减轻了成品的重量，可以较好的将石材效果体现在一些对承重有着较高要求的建筑中。

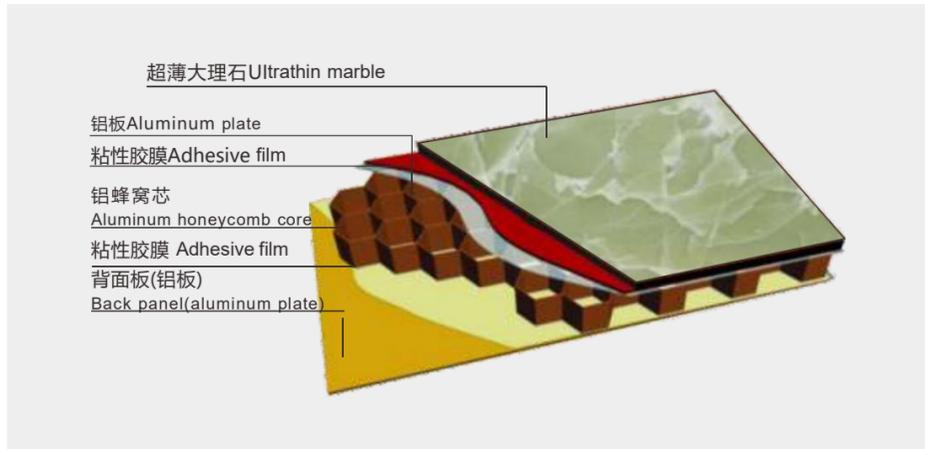

Ultra-thin stone honeycomb plate is a new building material, which is bonded and compounded by special adhesive. It has better impact resistance than ordinary natural stone, 8-11 kg per square meter, 1/7 of the weight of ordinary natural stone, but its compressive strength is 3-5 times that of ordinary natural stone. It completely overcomes the shortcomings of natural stone such as heavy weight and fragility, and provides a new generation of building materials with better performance and wider application fields.

Ultra-thin stone honeycomb composite slab is a kind of composite slab of about 3mm~5mm with aluminium honeycomb base material through adhesives. It not only saves stone but also reduces the weight of finished products. It can better reflect the effect of stone in some buildings with higher requirements for load-bearing.

石材铝蜂窝板结构图

Aluminum honeycomb harden composition

石材蜂窝板应用

APPLICATION OF STONE HONEYCOMB PANEL

CORRUGATED BOARD CEILING 瓦楞板天花

瓦楞板是以铝瓦楞芯为芯材，双面或单面粘铝铝的一种复合板材。其芯材由于预氧化铝合金薄板制作，常为水波纹型或梯形，增加芯材与面背板粘面积，提高粘强度，使这种产品具有优异性能。瓦楞芯采用0.2mm、0.25mm或0.3mm的铝板经过瓦楞机辊压成瓦楞状或梯形状。

产品特点：具有较高的挺度，抗压强度，质量轻等特点。

产品规格：较大宽度1220mm 高度（瓦楞芯拱高）4mm-12mm

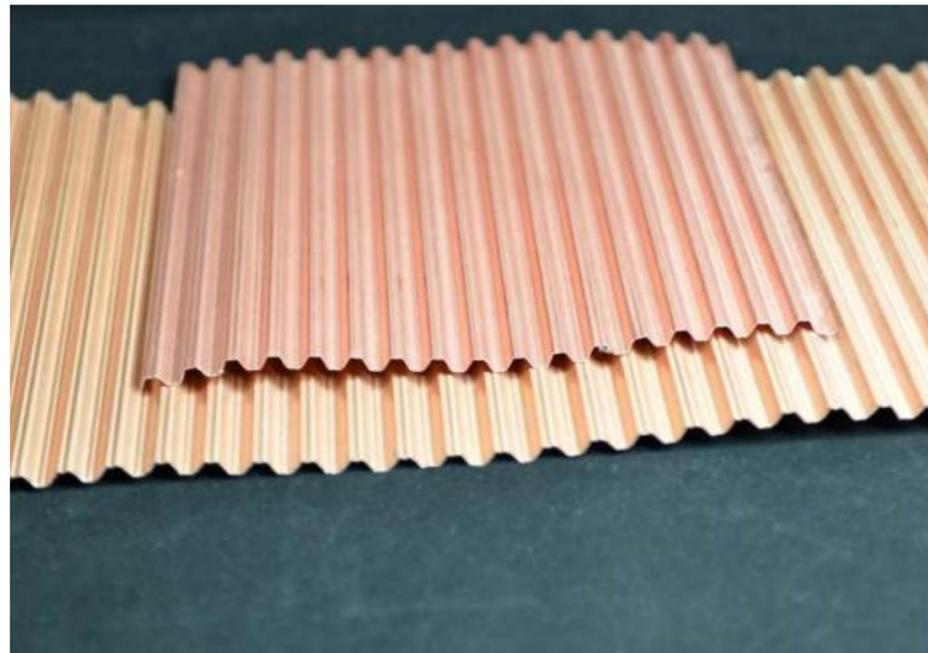

应用范围：建筑物外墙、阳台、候机楼、会议厅、歌剧院、体育馆、接待大堂等等。

corrugated plate is a composite plate with aluminum corrugated core as the core material and bonded with aluminum plate on both sides or one side. The core material is made of pre-alumina alloy sheet, which is often water ripple or trapezoid. It increases the bonding area between the core material and the face and back plate, and improves the bonding strength, so that this product has excellent performance. The corrugated core is made of 0.2mm, 0.25mm or 0.3mm aluminum plate and rolled into corrugated or ladder shape by the corrugated machine.

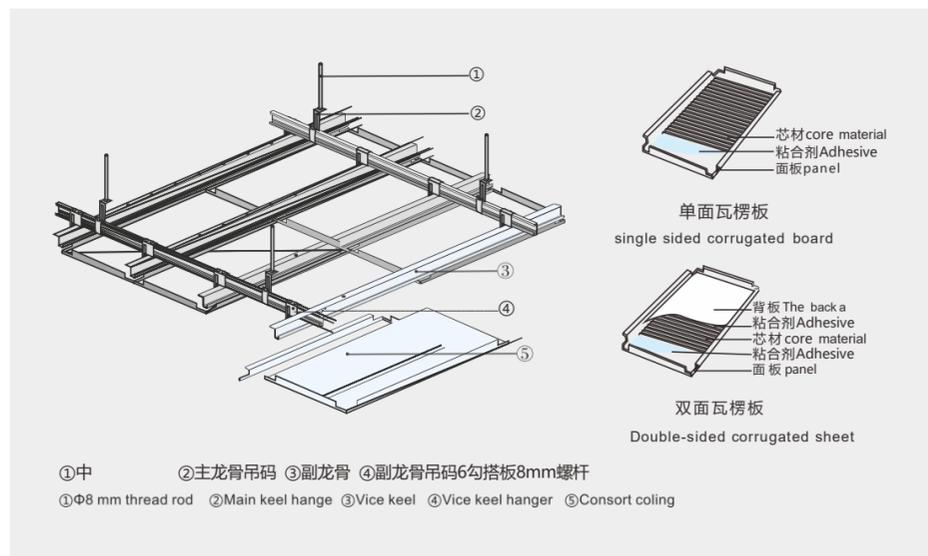

Product features: high stiffness, compressive strength, light weight and other characteristics.

Product specification: larger width 1220mm height (corrugated core arch height) 4mm-12mm

Application scope: building exterior wall, balcony, terminal building, conference hall, opera house, stadium, reception hall, etc.

瓦楞板天花安装示意图
Installation diagram of corrugated board ceiling

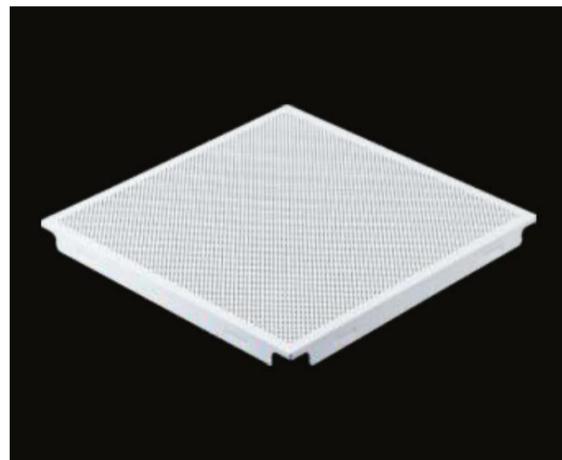

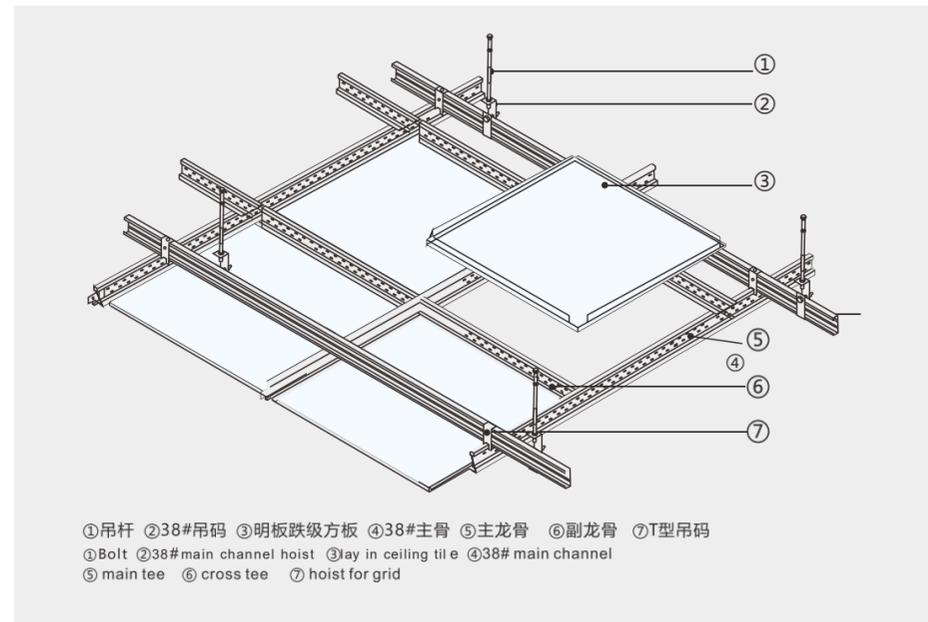

SQUARE PLATE OPEN FRAME CEILING 方板明架天花

方板明架天花，材质为AA级铝合金，板厚0.8mm-1.2mm，常用规格为600x600mm、600x1200mm、300x1200mm，多种模型，多种图案可供选择。方板明架天花造型极具现代感，丰富视觉效果，塑造独特的立体感，设计结构结合使用，拆装简易快捷。广泛应用于不同层次的建筑物，是风靡全球建筑市场的主要产品，是医院、商场、银行、车站、商务办公场所的理想装饰产品。

The square plate open frame ceiling is made of AA aluminum alloy, the plate thickness is 0.8mm-1.2mm, and the common specifications are 600x600mm, 600x1200mm and 300x1200mm. A variety of models and patterns are available. The square plate open frame ceiling has a very modern shape, rich visual effects and a unique three-dimensional feeling. It is used in combination with design structure, and the assembly and disassembly is simple and fast. It is widely used in buildings at different levels. It is the main product popular in the global construction market. It is an ideal decoration product for hospitals, shopping malls, banks, stations and business offices.

方板明架天花安装示意图
Installation diagram of square plate open frame ceiling

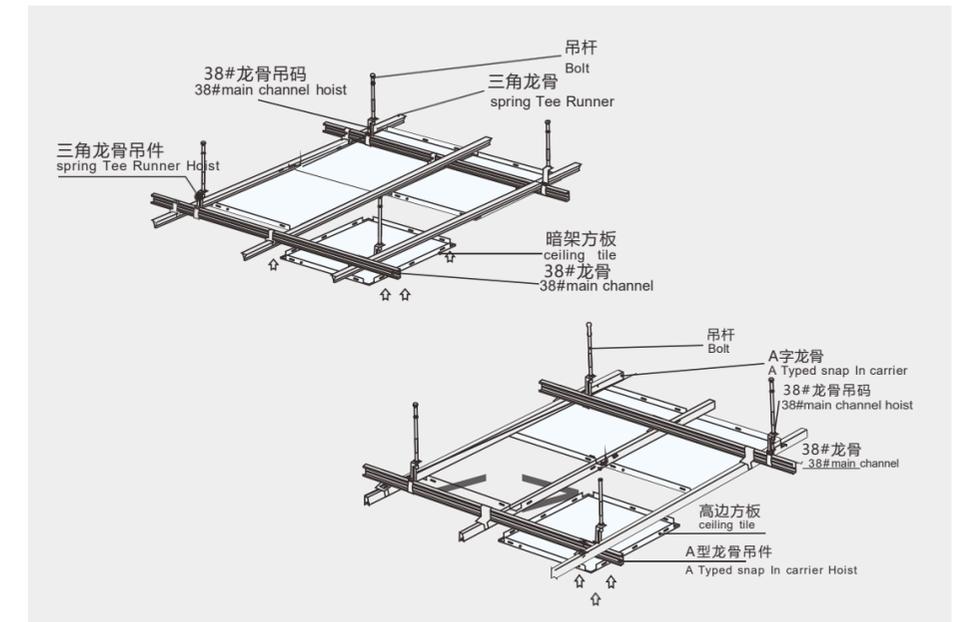

SQUARE PLATE CONCEALED CEILING 方板暗架天花

方板暗架天花结构严密、防水性强；安装结构为防风式特殊龙骨卡扣式结构，拼密性很强，绝无间隙。防水性强，高深龙骨、防风性强，高深龙骨上有固定模数的卡齿，金属天花针对防风性每个卡齿旁都设计有防风卡码，适合户外装饰，安全性高，可适合户外装置并可灵活组装使用，为设计师提供更广阔的构思空间。暗架天花既简洁美观，又能自由配搭组合出各种时尚的花样图案。广泛应用写字楼、宾馆、酒店、车站、机场、商场、娱乐场所、厨房、卫生间，高级住宅等大中小型建筑的装饰。

The square plate concealed ceiling structure is tight and waterproof; The installation structure is wind proof special keel snap structure, with strong tightness and no gap. strong waterproof, high and deep keels, strong wind resistance, high and deep keels are equipped with fixed modulus snap teeth, and the metal ceiling is designed with wind proof card code next to each snap tooth for wind resistance, which is suitable for outdoor decoration, high safety, suitable for outdoor devices and flexible assembly and use, providing designers with broader conceptual space. The concealed ceiling is simple and beautiful, and can freely match and combine various fashionable patterns. Widely used in office buildings, hotels, hotels, stations, airports, shopping malls, entertainment venues, kitchens, bathrooms, high-grade residential and other large, medium-sized and small building's decoration.

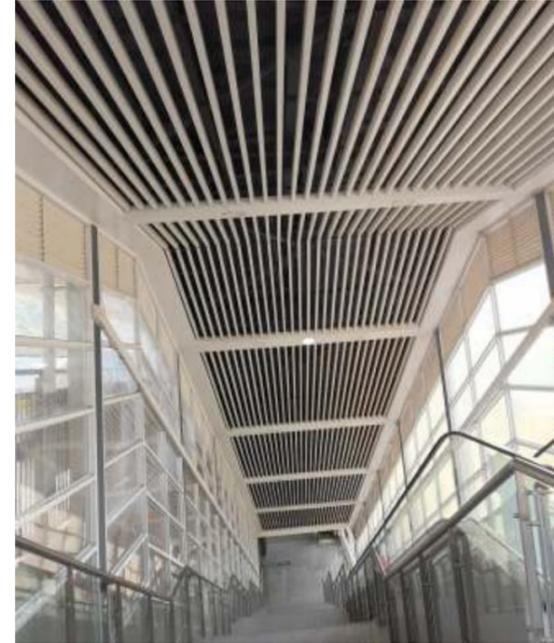

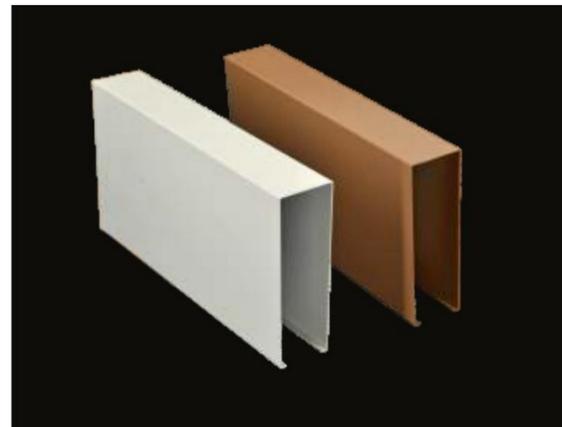

方板暗架天花安装示意图
Installation diagram of square plate concealed frame ceiling

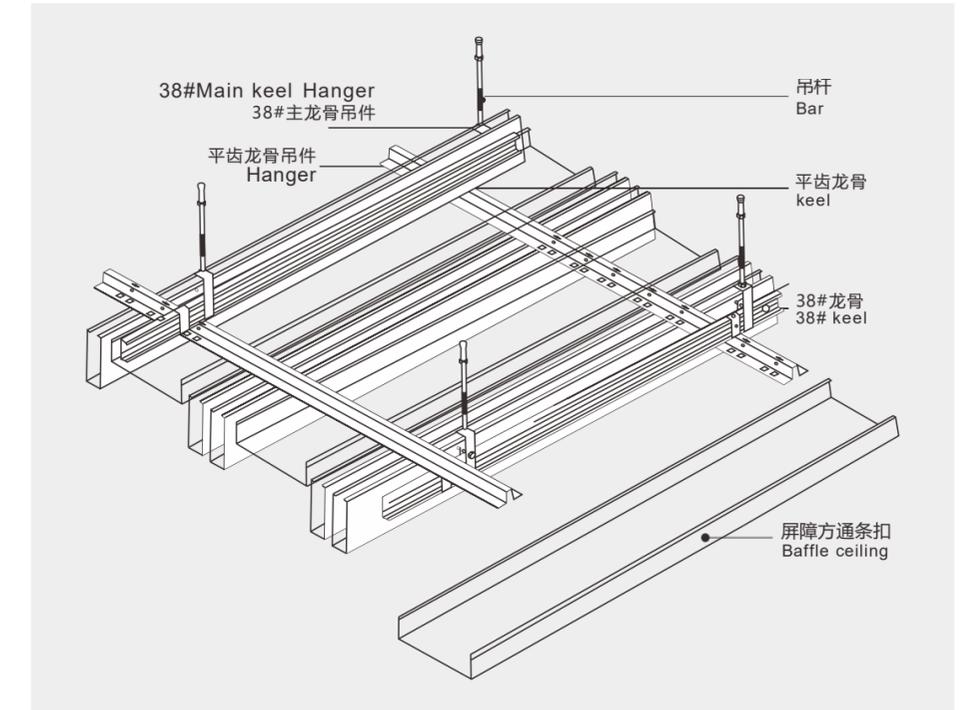

U-SHAPED SQUARE CEILING U型方通天花

U型铝方通是近几年来生产的吊顶材料之一，具有公开的视野、通风、透气，其线条明快整齐，层次分明，体现了简约明了的现代风格。安装拆卸简单方便，成为近几年风廊装饰市场的主要产品。U型铝方通规格有很多，而且规格支持定制，根据不同环境，不同装修风格，U型铝方通规格可以千变万化，自由组合。铝方通因为具有不易沾污，便于清洁保养的特性，所以应用范围非常广泛。通常在建筑物内外墙、梁柱、阳台、雨棚、机场、车站、医院、会议厅、歌剧院、体育场馆、接待大堂等建筑物都可以使用。

U-shaped aluminum square is one of the ceiling materials produced in recent years. It has open vision, ventilation and ventilation. Its lines are bright and neat, with clear layers, reflecting the simple and clear modern style. The installation and disassembly is simple and convenient, and has become the main product popular in the decoration market in recent years. There are many specifications of U-shaped aluminum square, and the specifications support customization. According to different environments and different decoration styles, the specifications of U-shaped aluminum square can be changed and combined freely. Aluminum square has a wide range of applications because it is not easy to stain and easy to clean and maintain. Generally, it can be used in buildings such as internal and external walls, beams and columns, balconies, canopies, airports, stations, hospitals, conference halls, opera houses, stadiums, reception halls and so on.

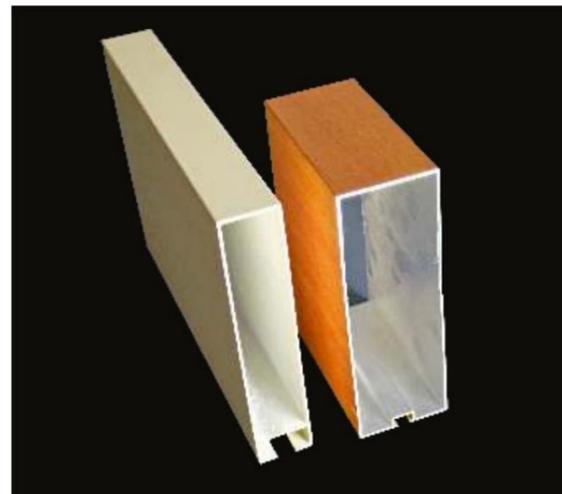

U型方通天花安装示意图
Installation diagram of u-shaped square ceiling

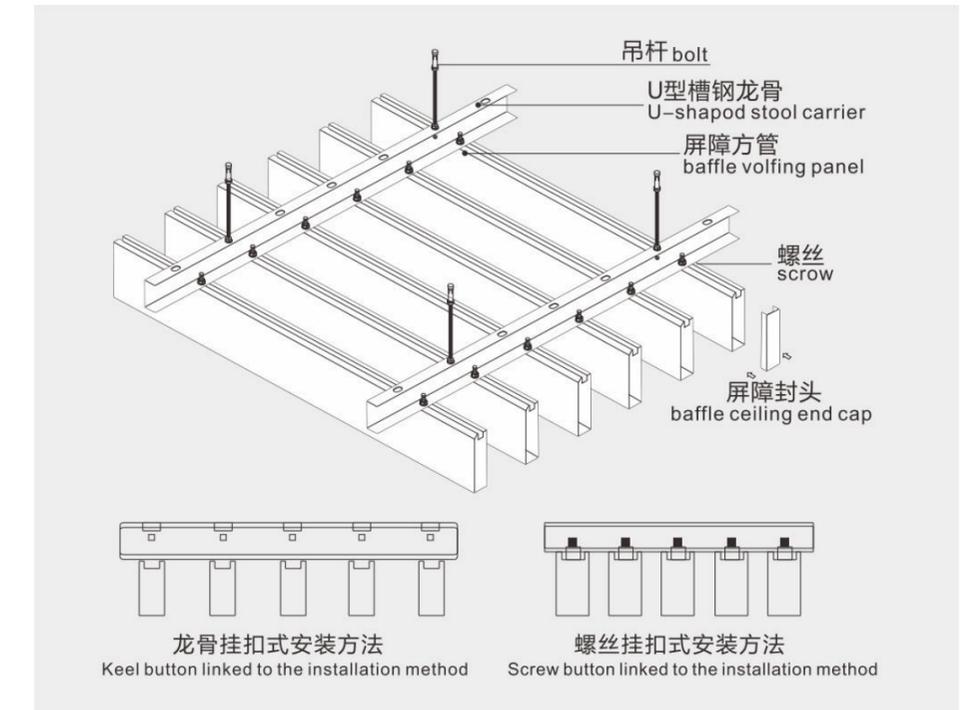

U-SHAPED PROFILE SQUARE CEILING U型型材方通天花

型材铝方通是经过模具定制，把液态铝水经模具浇灌后，再进行冷却成型，这样可在制造模具时加工成凹槽、凸槽、多边形、四方形、长方形等铝型材，也叫型材铝方管。铝方管装饰方向性，通透开阔，立体感强烈，棱角线条清晰明朗、新颖、层次分明。安装后整个空间和谐柔美的立体线条感，体现了简约明了的现代风格。型材铝方通是一种室内吊顶装修产品，它以美观、时尚、优雅的装饰效果，深得工程客户的喜欢。

The profile aluminum square is customized through the mold, and the liquid aluminum water is poured through the mold before cooling and forming. In this way, it can be processed into aluminum profiles such as grooves, convex grooves, polygons, squares and rectangles when manufacturing the mold, which is also called profile aluminum square tube. The aluminum square tube decoration is directional, transparent and open, with a strong three-dimensional sense, and the edges and lines are clear, novel and clear. After installation, the whole space has a harmonious and soft three-dimensional line feeling, which reflects the simple and clear modern style. Profile aluminum Fangtong is an indoor ceiling decoration product, which is deeply loved by engineering customers with beautiful, fashionable and elegant decoration effect.

U型型材方通天花安装示意图
Installation diagram of U-shaped profile square ceiling

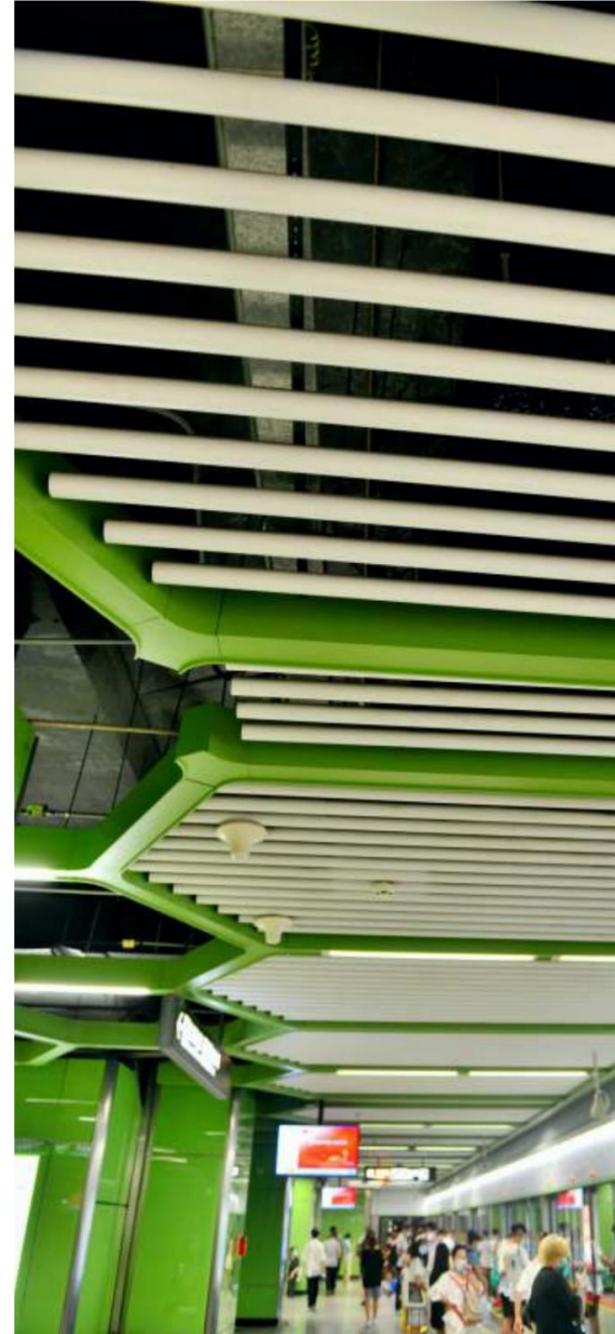

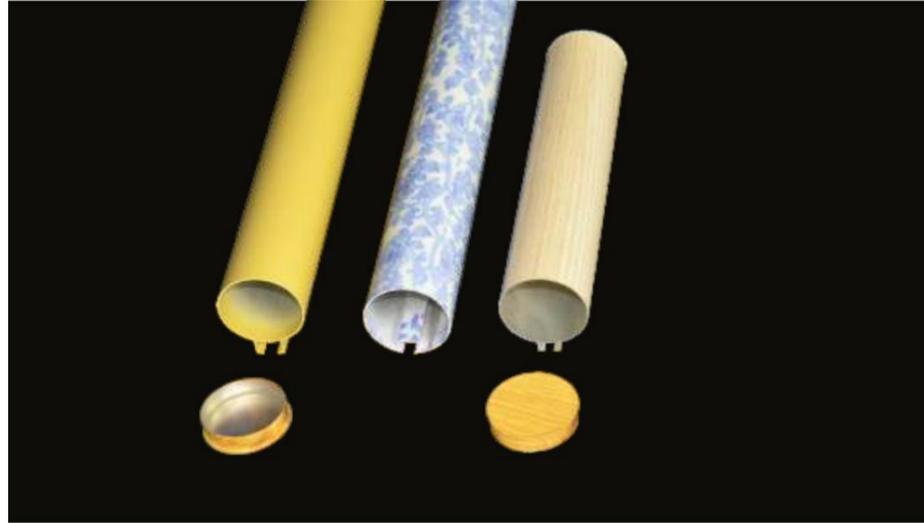

U-SHAPED PROFILE
SQUARE CEILING
型型方通天花

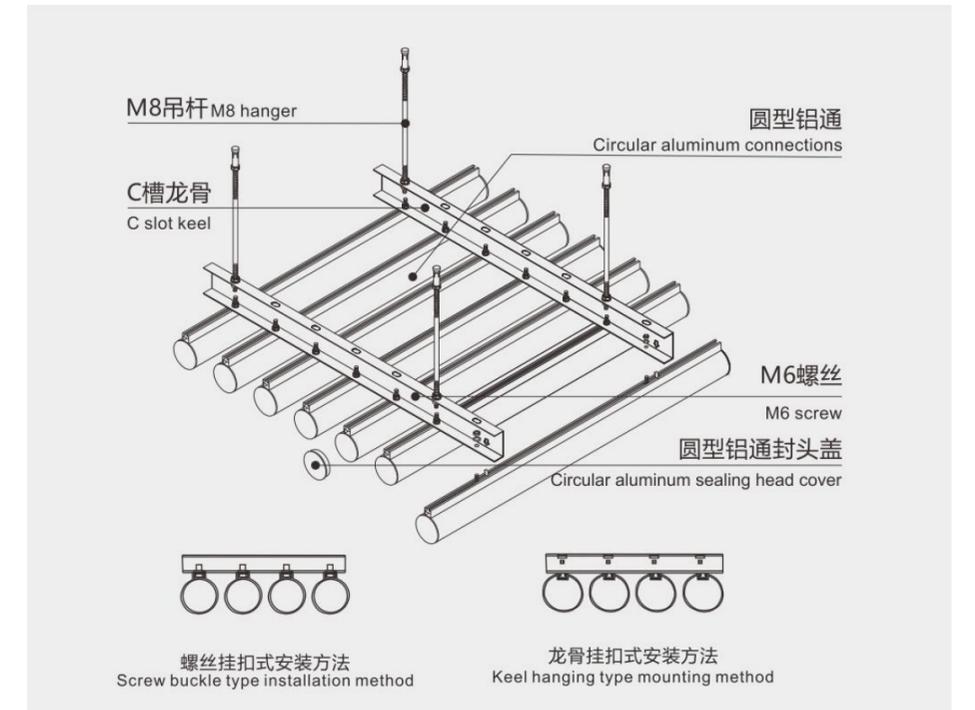

O-SHAPED ROUND PIPE CEILING O型圆管天花

铝圆通天花此系统具有开放的视野，其圆边式的线条明快柔和，安装后整个空间和谐柔美而不乏流畅的立体线条感，现代感效果非常好。铝圆通天花结构简单，由特殊铝材通过挤压成型，产品硬度好，安装结构为利用上层50#C槽为主骨，以螺丝和特造的构件与型材圆通连接，防风性强，适用于户外装饰，（龙骨间距可任意调节）。铝圆通天花维护方便，每条圆通都是独立的，可随意安装与拆卸，无须特别工具，方便维护和保养。可将灯具、空调系统、消防设备置于天花板上，以达到整体一致的视觉装饰效果。铝圆通天花型材圆通外表柔和，线条流畅，通风、透气，适用于地铁站、高铁站、车站、机场、大型购物商场、通道、墙面装饰、建筑物外墙等。

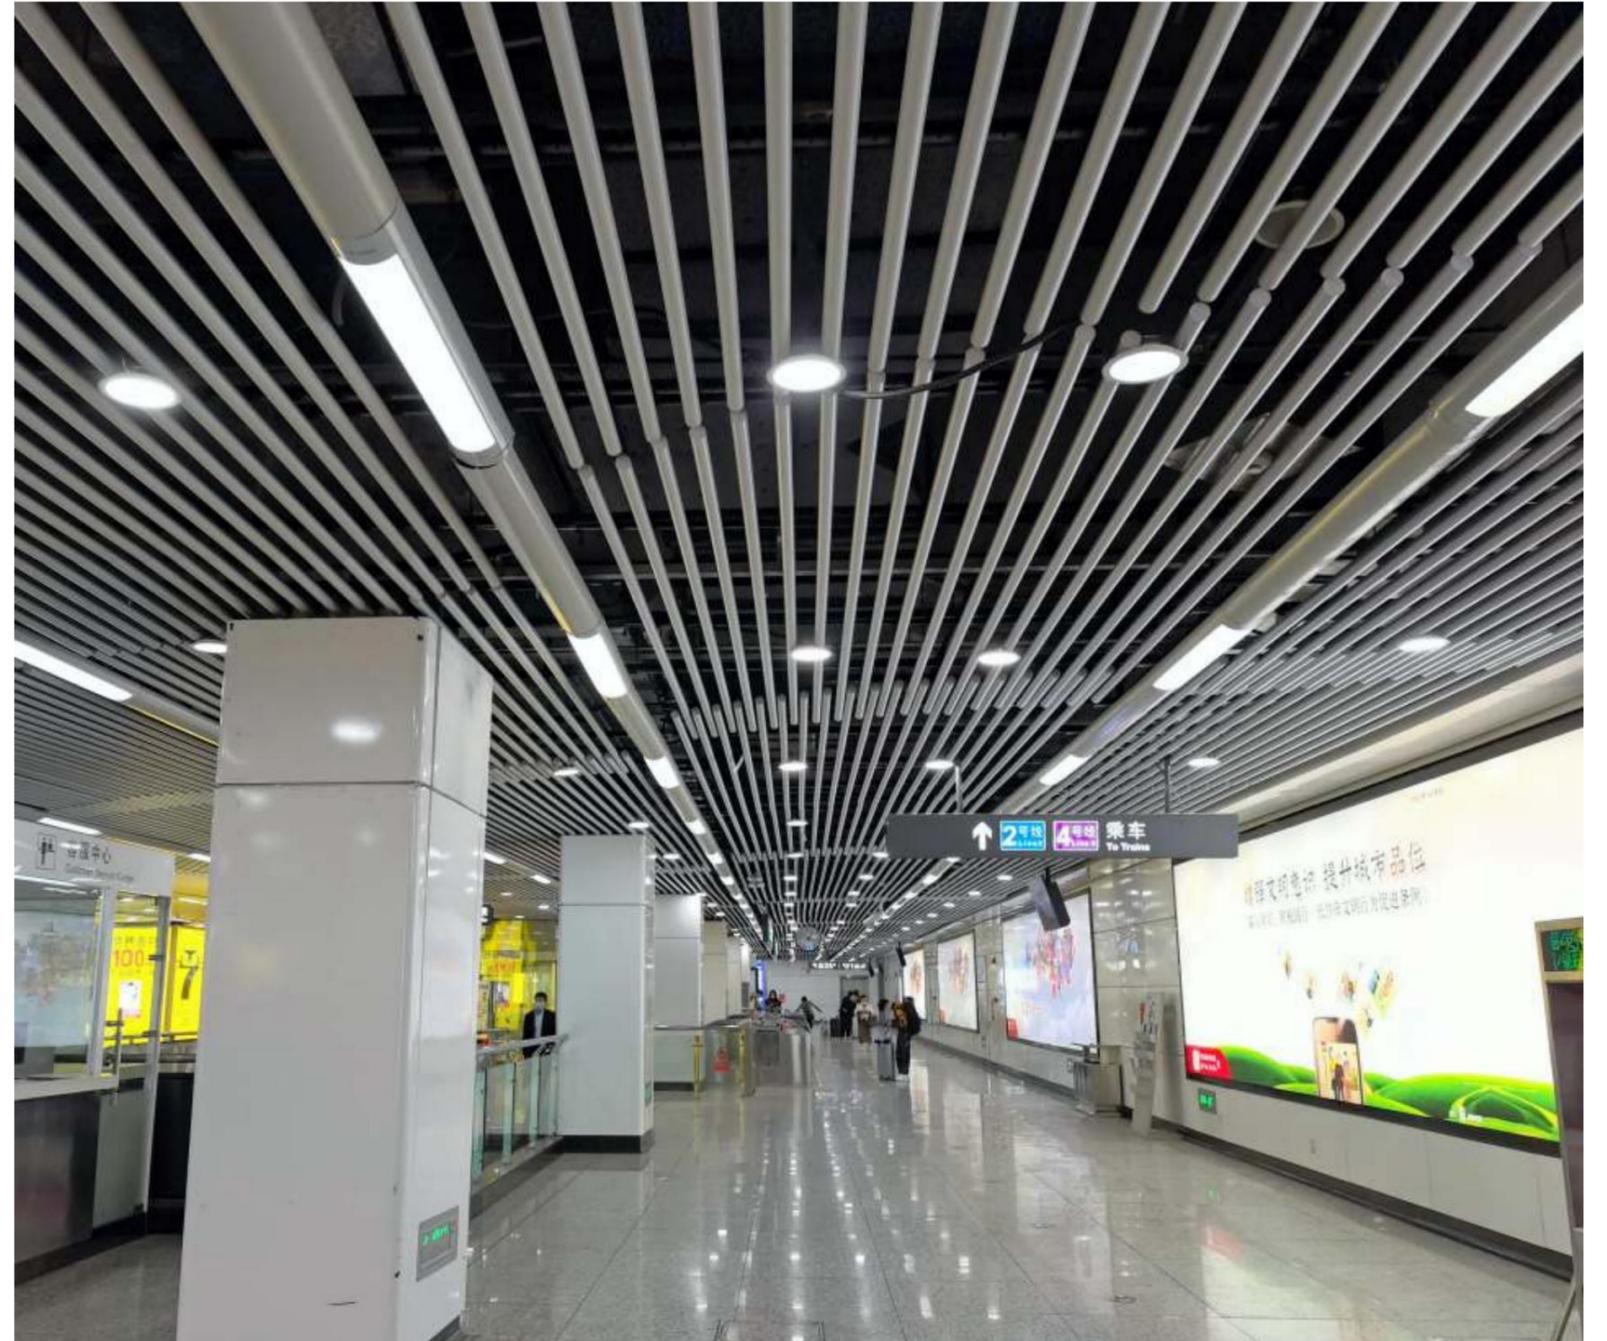

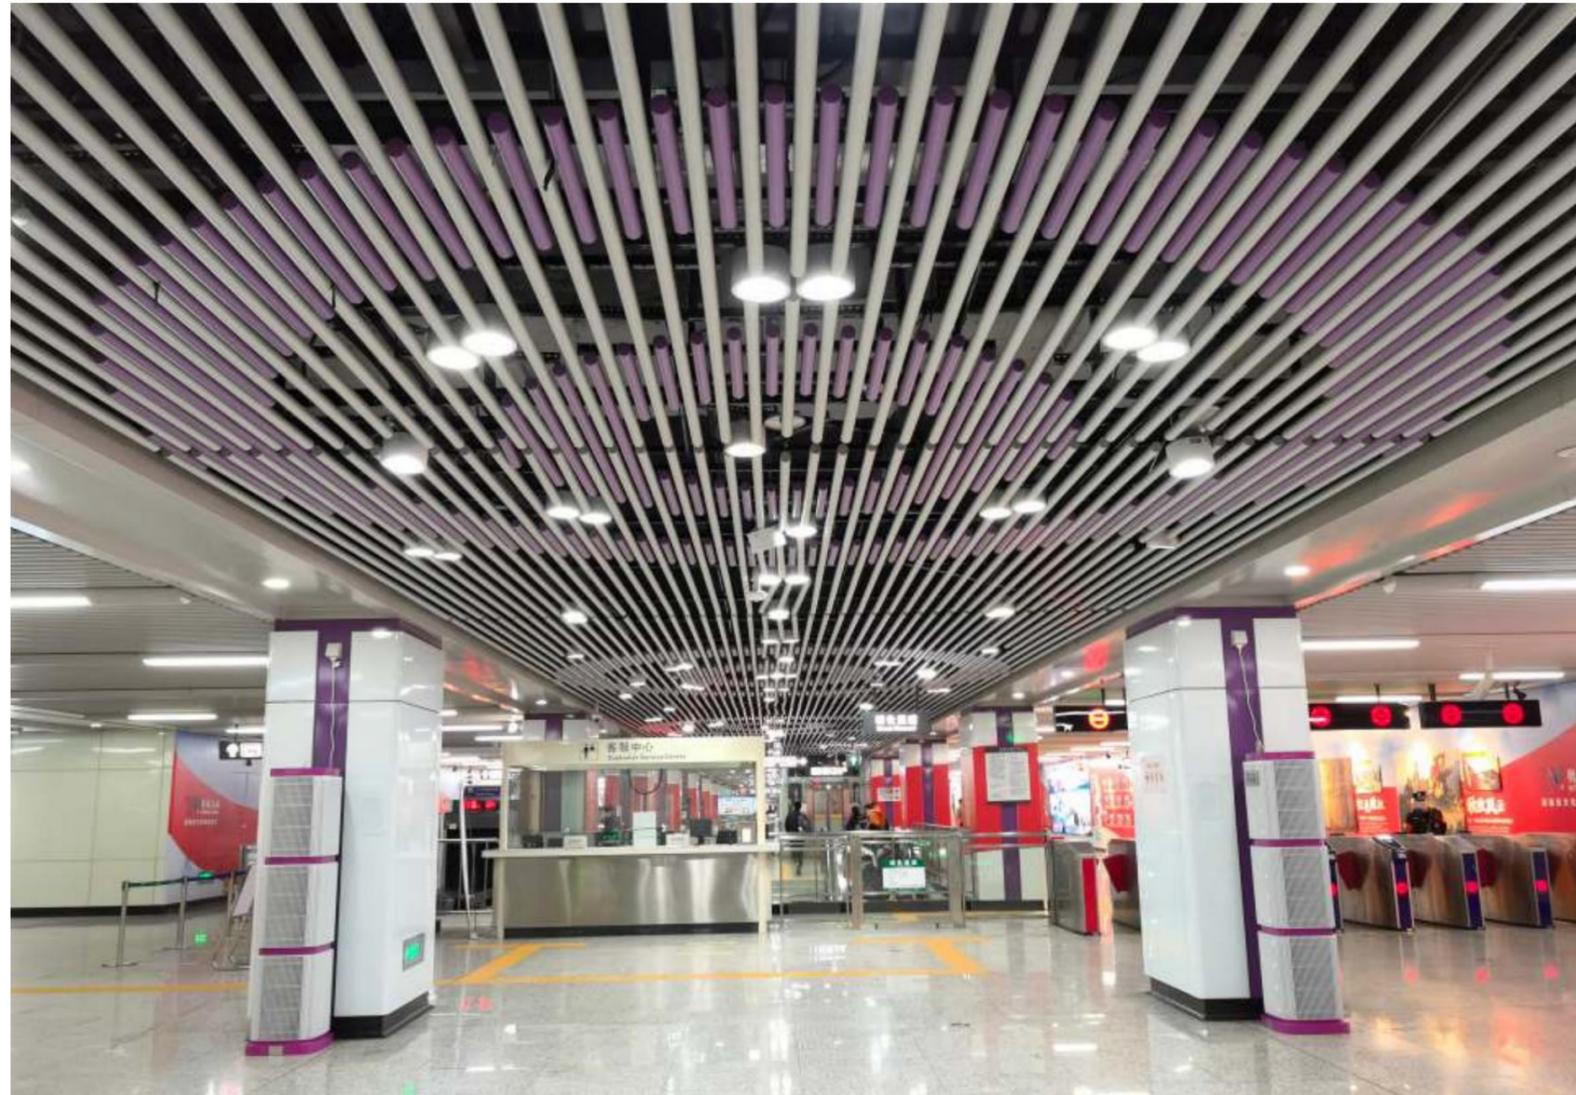

Aluminum round sky flower this system has an open vision. Its round edge lines are bright and soft. After installation, the whole space is harmonious and soft without lack of smooth three-dimensional line feeling. The effect of modernity is very good. The aluminum round ceiling has simple structure and is formed by extrusion of special aluminum materials. The product has good hardness. The installation structure is to use the upper 50#c groove as the main bone, and connect the screws and specially made components with the profile round. It has strong wind resistance and is suitable for outdoor decoration (the keel spacing can be adjusted arbitrarily). Aluminum round sky flower is easy to maintain. Each round flower is independent and can be installed and disassembled at will without special tools, which is convenient for maintenance. Lamps, air conditioning systems and fire fighting equipment can be placed in the ceiling to achieve an overall consistent visual decoration effect. Aluminum round ceiling profiles are round, soft in appearance, smooth in lines, ventilated and breathable. They are suitable for subway stations, high-speed railway stations, stations, airports, large shopping malls, passages, wall decoration, building exterior walls, etc.
